

First Citizens Bank Limited And Its Subsidiaries

(A Subsidiary of First Citizens Holdings Limited)

Consolidated Financial Statements

30 September 2018

(Expressed in Trinidad and Tobago dollars)

First Citizens

Statement of Management's Responsibility

Management is responsible for the following:

- Preparing and fairly presenting the accompanying consolidated financial statements of First Citizens Bank Limited and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 30 September 2018, the consolidated income statement, consolidated statements of comprehensive income, changes in equity and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information;
- Ensuring that the Group keeps proper accounting records;
- Selecting appropriate accounting policies and applying them in a consistent manner;
- Implementing, monitoring and evaluating the system of internal control that assures security of the Group's assets, detection/prevention of fraud and the achievement of company operational efficiencies;
- Ensuring that the system of internal control operated effectively during the reporting period;
- Producing reliable financial reporting that comply with laws and regulations, including the Companies Act and the Financial Institution Act (FIA) 2008 and
- Using reasonable and prudent judgement in the determination of estimates.

In preparing these audited consolidated financial statements, management utilised the International Financial Reporting Standards, as issued by the International Accounting Standards Board and adopted by the Institute of Chartered Accountants of Trinidad and Tobago. Where International Financial Reporting Standards presented alternative accounting treatments, management chose those considered most appropriate in the circumstances.

Nothing has come to the attention of management to indicate that the Group will not remain a going concern for the next twelve months from the reporting date or up to the date the accompanying consolidated financial statements have been authorised for issue, if later.

Management affirms that it has carried out its responsibilities as outlined above.

Karen Darbasie
Group Chief Executive Officer
19 December 2018

Independent Auditor's Report

To the shareholders of
First Citizens Bank Limited and its subsidiaries

Report on the audit of the consolidated financial statements

Our opinion

In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of First Citizens Bank Limited (the Company) and its subsidiaries (together 'the Group') as at September 30, 2018, and their consolidated financial performance and their consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

What we have audited

First Citizens Bank Limited's consolidated financial statements comprise:

- the consolidated statement of financial position as at 30 September, 2018;
- the consolidated income statement for the year then ended;
- the consolidated statement of comprehensive income for the year then ended;
- the consolidated statement of changes in equity for the year then ended;
- the consolidated statement of cash flows for the year then ended; and
- the notes to the consolidated financial statements, which include significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Our audit approach

Overview

Overall group materiality: TT\$50 million, which represents 5% of profit before tax.

- The group audit included full scope audits of four significant components, three domiciled in Trinidad and Tobago and one in Barbados.
- The group audit covered 92% of profit before tax and 99% of total assets.
- Implementation of IFRS 9 'Financial Instruments'
- Impairment of Government of Barbados financial assets
- Expected credit loss for individually significant loans
- Valuation of unquoted investments

Audit scope

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the consolidated financial statements. In particular, we considered where management made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including, among other matters, consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

How we tailored our group audit scope

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the consolidated financial statements as a whole, taking into account the structure of the Group, the accounting processes and controls and the industry in which the Group operates.

Our assessment of the components of the Group focused primarily on the Group's legal entities. The following components below were considered individually financially significant components and were subject to full scope audits for group audit purposes:

- First Citizens Bank Limited
- First Citizens Investment Services Limited
- First Citizens Asset Management Limited

First Citizens Bank Barbados Limited was considered a significant component based on risk. In establishing the overall group audit strategy and plan, we determined the type of work that is needed to be performed at the components by the group engagement team and by component auditors. Where the work was performed by component auditors, we determined the level of involvement we needed to have in the audit work. Our group scoping provided coverage of approximately 92% of profit before tax and 99% of total assets of the Group. We also performed Group level risk assessment analytical procedures over the remaining components.

Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the consolidated financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall group materiality for the consolidated financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate, on the consolidated financial statements as a whole.

Overall group materiality	TT\$50 million
How we determined it	5% of profit before tax
Rationale for the materiality benchmark applied	We chose profit before tax as the benchmark because, in our view, it is the benchmark against which the performance of the Group is most commonly measured by users, and is a generally accepted benchmark. We chose 5% which is within a range of acceptable benchmark thresholds.

We agreed with the Audit Committee that we would report to them misstatements identified during our audit above TT\$2.5 million, as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Independent Auditor's Report (continued)

Key audit matter	How our audit addressed the key audit matter	Key audit matter	How our audit addressed the key audit matter
<p>Implementation of IFRS 9 'Financial Instruments'</p> <p>Refer to note 2.e.i. & 3.a. to the consolidated financial statements for disclosures of related accounting policies and balances.</p> <p>The Group adopted the accounting standard IFRS 9 'Financial instruments' during the financial year. The standard introduces new requirements around two main aspects of how financial instruments are treated - measurement and classification and impairment.</p> <p>IFRS 9 introduces a new classification and measurement approach for financial assets that reflect the business model in which the financial assets are managed and the underlying cashflow characteristics. IFRS 9 contains three principal classification categories for financial assets:</p> <ul style="list-style-type: none"> - Measured at amortised cost, - Fair value through other comprehensive income (FVOCI); and - Fair value through profit and loss (FVPL). <p>IFRS 9 introduces new impairment rules which prescribe a new, forward looking, expected credit loss ('ECL') impairment model which takes into account reasonable and supportable forward looking information which will generally result in the earlier recognition of impairment provisions.</p> <p>We have focused on this area, because there are a number of significant judgements which management will need to determine as a result of the requirements in measuring ECL under IFRS 9:</p> <ul style="list-style-type: none"> - Determining the criteria for a significant increase in credit risk; - Techniques used to determine probability of default (PDs) and loss given default (LGD); and - Factoring in possible future economic scenarios. <p>These judgements have required new models to be built and implemented to measure the expected credit losses on loans and investments measured at amortised cost in addition to investments measured at fair value through other comprehensive income. Management engaged a credit modeller expert to assist in the more complex aspects of the expected credit loss model.</p> <p>There is a large increase in the data inputs of these models which increases the risk that the data used to develop assumptions and operate the model is not complete or accurate.</p> <p>The impact on net assets from the implementation of the measurement and classification aspects of the standard was not material.</p> <p>Differences between previously reported and new carrying amounts of financial instruments as a result of the implementation of the new ECL model as at 1 October 2017 of TT\$146M have been recognised in the opening retained earnings.</p>	<p>With respect to the measurement and classification of the financial assets and liabilities, we read the relevant accounting policies adopted by the Group and compared them to the requirements of the standard.</p> <p>We obtained an understanding of the Group's business model assessment and for a sample of instruments verified the inputs into the solely payments of principal and interest test performed by the client with original contracts.</p> <p>We tested the opening equity adjustments in relation to the adoption of the new standard's classification and measurement requirements.</p> <p>With respect to the ECL model, our audit approach was as follows:</p> <ul style="list-style-type: none"> - We read the Group's impairment provisioning policies and compared them to the requirements of IFRS 9; - We tested the ratings used in the ECL model for a sample of instruments. For investment ratings, the Group's ratings were compared to publically available S&P data. For loans, source documents used in the Group's internal rating process were verified; - For a sample of instruments, we tested whether the significant increase in credit risk and default definitions were appropriately applied and the resulting impact of this on the staging of the instruments. - We tested the loss given default in the ECL calculation for a sample of instruments, including the value of collateral where appropriate. - In assessing the reasonableness of the probability of default, we verified the critical data inputs into the vintage analysis against source documents. - We obtained an understanding of the method used to estimate the impact of prepayment features and undrawn commitments on the exposure at default and tested its application for a sample of instruments. - For the forward looking assumptions, we obtained an understanding of the relevance of the macro economic indicators used and tested the application of the assumptions in the model. - We tested the critical data fields used in the ECL model, such as origination date, date of maturity, credit rating, date of default if any, principal, interest rate, collateral type and value, by tracing data back to source documents. - We tested the completeness of the amounts assessed for impairment, including off balance sheet credit exposures. <p>We utilised the services of our accounting specialists to assess whether the financial statement disclosures arising on adoption of IFRS 9 are in accordance with the requirements of the standard.</p> <p>Based on the procedures described above, no material exceptions were noted in our assessment of the Group's implementation of IFRS 9, including its provisioning in accordance with its newly adopted expected credit loss.</p>	<p>Impairment of Government of Barbados financial assets</p> <p>Refer to notes 4.c. to the consolidated financial statements for disclosures of related accounting policies and balances.</p> <p>Within the Group's holdings of investment securities and cash and due from banks there are financial assets amounting to TT\$921 million before ECL (comprised of TT\$885 million of Barbados dollar debt & TT\$36 million of US dollar debt) issued by the Government of Barbados (GOB).</p> <p>During the financial year, GOB announced its intention to restructure both local and foreign currency denominated debt. Subsequent to the financial year end, restructure terms were agreed on for debt denominated in Barbados dollars. The restructure terms resulted in an exchange of financial instruments.</p> <p>As at the financial year end, the carrying value of the existing Barbados dollars instruments was based on the fair value of the new instruments. Management determined the fair value of these new instruments by applying an estimated discount rate to the future cashflows outlined in the restructure terms.</p> <p>The carrying value of the US dollar denominated instruments was based on an estimated loss given default which was derived from an analysis of historical sovereign defaults conducted by a reputable international rating agency. The facility was considered to be in default thereby resulting in a PD of 100%. The exposure at default was the outstanding principal and accrued interest for these instruments at the end of the financial year.</p> <p>We focused on this area because of the significant judgement involved in arriving at the estimated values and the limited external evidence to support the Group's valuations.</p>	<p>With respect to the Barbados dollar denominated debt, with the assistance of our valuation experts, we de-veloped an independent yield curve in order to estimate the time value of money for the defaulted instruments.</p> <p>The independently developed yield curve was arrived at by finding the average of 3 relevant proxy curves:</p> <ul style="list-style-type: none"> - Historical spread between the US curve and another regional sovereign that experienced a default in the last 5 years; - Historical spread between the US curve and the Barbados curve - Standard B rated curve from a reputable international valuation provider. <p>The independently developed yield curve was then applied to the cashflows outlined in the restructure agreement.</p> <p>We inspected the restructure agreement and compared our understanding of the revised terms and conditions to management's application of the accounting for the bonds.</p> <p>The resulting net present value derived from the independently developed yield curve when compared to the Group's ECL was within an acceptable range of outcomes.</p> <p>In the absence of restructure terms for the US dollar denominated debt, the ECL model was used to estimate the impairment loss on those instruments.</p> <p>For the US dollar denominated debt, the loss given default percentage that was used to arrive at the expected credit loss was compared to publically available information from a reputable international credit rating agency on historical recoveries of defaulted instruments and found to be reasonable.</p> <p>The mathematical accuracy of the ECL calculation was also tested and no material exceptions were identified.</p>
		<p>Expected credit loss for individually significant loans</p> <p>Refer to notes 2.e.i. & 3.a. to the consolidated financial statements for disclosures of related accounting policies and balances.</p> <p>Included in the statement of financial position are loans that have been individually assessed for impairment and provisioning amounting to TT\$4.9 billion.</p> <p>Individually significant loans are considered by the Group to be individual credit facilities in excess of TT\$100M. On an annual basis, the Group assesses whether there is objective evidence that individual loans and advances or groups of loans are impaired.</p> <p>The probability of default for individually significant loans was derived in accordance with the newly adopted ECL model. A vintage analysis, that allows for performance comparisons between portfolio segments was performed in order to assess the likelihood of corporate facilities defaulting in the future.</p>	<p>In assessing the reasonableness of the probability of default used in the ECL calculation for individually significant loans, we tested the critical data inputs into the vintage analysis to source documents.</p> <p>For the loss given default, we assessed the reputation, independence, competence and experience of management's valuers and found no evidence to suggest that the objectivity of the valuator in the performance of the valuations of collateral was compromised.</p> <p>We examined the valuations and evaluated the reasonableness of the key assumptions such as rental rates per square foot and discount rates used in those valuations. Where comparable market data was available, we compared the values used by management and noted that they were consistent with market data.</p>

Notes to the Consolidated Financial Statements

(Expressed in Trinidad and Tobago dollars)

1 General information

First Citizens Bank Limited (the Bank) and its subsidiaries (together the Group) provide retail, commercial and corporate banking as well as investment banking services. The Group operates primarily in Trinidad and Tobago and the Eastern Caribbean region.

The Bank is a subsidiary of First Citizens Holdings Limited (Holdings), a company owned by the Government of the Republic of Trinidad and Tobago (GORTT), and its registered office is located at 9 Queen's Park East, Port of Spain. First Citizens Holdings has 64.43% controlling interest. The remainder of the shares are listed on the Trinidad and Tobago Stock Exchange and are publicly traded.

On 12 September 1993, the Workers' Bank (1989) Limited, National Commercial Bank of Trinidad and Tobago Limited and Trinidad Co-operative Bank Limited under and by virtue of vesting orders made by the Minister of Finance under section 49 of the Financial Institutions Act, 1993, were transferred to and became vested in the Bank.

All entities which were transferred to, or from which specific assets or liabilities were transferred to the Bank, were wholly owned or controlled by the Government of the Republic of Trinidad and Tobago (GORTT). Therefore, the transfers were recorded as a combination of interests under common control whereby all assets and liabilities transferred to the Bank were transferred at their carrying amounts in the accounts of the transferred or transferring entities at the dates of the respective transfers.

Effective September 1 2018, the Bank sold First Citizens Portfolio and Investments Managements Services Limited (FCPIMSL) formerly First Citizens Securities Trading to First Citizens Investments Services Limited (FCIS).

The Group currently comprises the following entities:

Entity	Nature of operations	Country of incorporation	Ownership interest
First Citizens Asset Management Limited	The Company acts as custodian for the First Citizens Group and provides bond paying agent services.	Trinidad & Tobago	100%
First Citizens Bank (Barbados) Limited	Banking, including the provision of mortgages for residential and commercial properties	Barbados	100%
First Citizens Costa Rica SA	Service related transactions	Costa Rica	100%

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

1 General information (continued)

Entity	Nature of operations	Country of incorporation	Ownership interest
First Citizens Financial Services (St. Lucia) Limited	Selected banking and financial service operations	St. Lucia	100%
First Citizens Investment Services Limited and its subsidiaries	Investment & asset management services and repo business	Trinidad & Tobago	100%
First Citizens (St. Lucia) Limited	Selected banking and financial service operations	St. Lucia	100%
First Citizens Trustee Services Limited	Provision of trustee, administration and bond paying agency services	Trinidad & Tobago	100%
The Group also has investments in the following entities:			
Infolink Services Limited	Provision of automated banking reciprocity services	Trinidad & Tobago	25%
Trinidad and Tobago Interbank Payment System Limited	Automated clearing house	Trinidad & Tobago	14%
St. Lucia Electricity Services Limited	Provision of electrical power to consumers	St. Lucia	19%

2 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

a. Basis of preparation

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) and IFRS Interpretation Committee (IFRS IC) applicable to companies reporting under IFRS. These financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB). The consolidated financial statements are prepared under the historical cost convention as modified by the revaluation of freehold premises, hold to collect and sell financial assets and financial assets classified at fair value through profit or loss (FVTPL) and liabilities.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group's accounting policies. The areas involving a higher degree of judgment or complexity or areas where assumptions and estimates are significant to the consolidated financial statements are disclosed in Note 4.

(i) Standards, amendment and interpretations which are effective and have been adopted by the Group in the accounting period:

- IAS 7 - Disclosure Initiative (Amendments effective 1 January 2017.) Amends IAS 7 Statement of Cash Flows to clarify that entities shall provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities.
- IAS 12 Income taxes (Amendment effective 1 January 2017). Recognition of Deferred Tax Assets for Unrealised Losses – This amendment is to clarify the following aspects:
 - Unrealised losses on debt instruments measured at fair value and measured at cost for tax purposes give rise to a deductible temporary difference regardless of whether the debt instrument's holder expects to recover the carrying amount of the debt instrument by sale or use.
 - The carrying amount of the asset does not limit the estimation of probable future taxable profits.
 - Estimates for future taxable profits exclude tax deductions resulting from the reversal of deductible temporary differences.
 - An entity assesses a deferred tax assets in combination with other deferred assets. Where tax law restricts the utilisation of tax losses, an entity would assess a deferred tax assets in combination with other deferred tax assets of the same type.
- IFRS 9, 'Financial instruments part 1: Classification and measurement' (effective 1 January 2018). IFRS 9 was issued in November 2009 and October 2010. It replaces the parts of IAS 39 that relate to the classification and measurement of financial instruments. The completed standard was issued in July 2014, with an effective date of 1 January 2018. IFRS 9 requires financial assets to be classified into three measurement categories: those measured as at fair value, those measured at amortised cost and those held for trading. The determination is made at initial recognition. The classification depends on the entity's business model for managing its financial instruments and the contractual cash flow characteristics of the instrument. For financial liabilities, the standard retains most of the IAS 39 requirements. The main change is that, in cases where the fair value option is

taken for financial liabilities, the part of a fair value change due to an entity's own credit risk is recorded in other comprehensive income rather than the income statement, unless this creates an accounting mismatch. The additional amendments in July 2014 introduced a new expected loss impairment model and limited changes to the classification and measurement requirements for financial assets. This amendment completes the IASB's financial instruments project and the Standard. (Ref. Note 2.1)

(ii) Standards, amendments and interpretations to existing standards that are not yet effective and have not been early adopted by the Group:

The following standards, amendments and interpretations to existing standards are not yet effective for accounting periods beginning on or after 1 January 2017 and have not been early adopted by the Group:

- IFRS 15 Revenue from Contracts with Customers (effective 1 January 2018). This standard provides a single, principles based five-step model to be applied to all contracts with customers. The five steps in the model are as follows:
 - Identify the contract with the customer
 - Identify the performance obligations in the contract
 - Determine the transaction price
 - Allocate the transaction price to the performance obligations in the contracts
 - Recognise revenue when (or as) the entity satisfies a performance obligation.
- IFRS 16 Leases (effective 1 January 2019). This standard specifies how an IFRS reporter will recognise, present and disclose leases. The standard provides a single lessee accounting model, requiring lessees to recognise assets and liabilities for all leases unless the lease term in 12 months and less or the underlying assets has a low value. Lessors continue to classify leases as operating or finance.
- IFRS 2 - Classification and Measurement of Share-based Payment Transactions (Amendments effective 1 January 2018). This amendment is to clarify the standard in relation to the accounting for cash-settled share-based payment transactions that include a performance condition, the classification of share-based payment transactions with net settlement features, and the accounting for modifications of share-based payment transactions from cash-settled to equity-settled.
- IFRIC 22 - Foreign currency transactions and advances consideration (Effective 1 January 2018). This IFRIC addresses foreign currency transactions or part of transactions where there is consideration that is denominated or priced in a foreign currency. The interpretation provide guidance for when a single payment/receipt is made as well as for situations where multiple payments/receipts are made. The guidance aims to reduce diversity in practice.
- IFRIC 23 – Uncertainty over Income Tax Treatments (Effective 1 January 2018). The interpretation addresses the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12. It specifically considers:
 - Whether tax treatments should be considered collectively
 - Assumptions for taxation authorities' examinations
 - The determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates
 - The effect of changes in facts and circumstances

The Group is in the process of assessing the impact of the new and revised standards not yet effective on the Financial Statements, we do not anticipate any material impact.

b. Consolidation

(i) Principles of consolidation

The consolidated financial statements include the accounts of the Bank and its wholly owned subsidiaries as outlined in Note 1. The financial statements of the consolidated subsidiaries used to prepare the consolidated financial statements were prepared as of the parent company's reporting date. The consolidation principles are unchanged as against the previous years'.

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated on consolidation. Unrealised losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred. The accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

(ii) Investment in subsidiaries

Subsidiaries are all entities, (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

b. Consolidation (continued)

(ii) Investment in subsidiaries (continued)

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of the acquiree's identifiable net assets.

(iii) Business combinations and goodwill

Acquisition-related costs are expensed as incurred.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration in relation to financial instruments to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with IAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in the consolidated income statement.

(iv) Transactions and non-controlling interests

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions – that is, as transactions with the owners in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(v) Investment in joint ventures

The Group has applied IFRS 11 to all joint arrangements as of 1 October 2012. Under IFRS 11 investments in joint arrangements are classified as either joint operations or joint ventures depending on the contractual rights and obligations of each investor. The Group has assessed the nature of its joint arrangements and determined them to be joint ventures. Joint ventures are accounted for using the equity method.

Under the equity method of accounting, interests in joint ventures are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses and movements in other comprehensive income. When the Group's share of losses in a joint venture equals or exceeds its interests in the joint ventures (which includes any long-term interests that, in substance, form part of the Group's net investment in the joint ventures), the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the joint ventures.

(vi) Investment in associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are initially recognised at cost and adjusted thereafter to recognise the Group's share of the post-acquisition profits or losses and movements in other comprehensive income. The Group's investment in associates includes goodwill identified on acquisition.

If the ownership interest in an associate is reduced but significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income is reclassified to profit or loss where appropriate.

The Group's share of post-acquisition profit or loss is recognised in the income statement, and its share of post-acquisition movements in other comprehensive income is recognised in other comprehensive income with a corresponding adjustment to the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, the Group does not recognise further losses, unless it has incurred legal or constructive obligations or made payments on behalf of the associate.

The Group determines at each reporting date whether there is any objective evidence that the investment in the associate is impaired. If this is the case, the Group calculates the amount

of impairment as the difference between the recoverable amount of the associate and its carrying value and recognises the amount adjacent to 'share of profit/ (loss) of associates' in the consolidated income statement.

Profits and losses resulting from upstream and downstream transactions between the Group and its associate are recognised in the Group's financial statements only to the extent of unrelated investor's interests in the associates. Unrealised losses are eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

c. Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the functional currency). The consolidated financial statements are presented in Trinidad and Tobago dollars, which is the Group's presentation currency. The exchange rate between the TT dollar and the US dollar as at the date of these statements was TT\$6.6926 = US\$1.00 (2017 - TT\$6.6926 = US\$1.00), which represent the Group's mid rate. The exchange rate between the TT dollar and the Barbados dollar as at the date of these statements was TT\$3.4102 = BB\$1 (2017 - TT\$3.4102 = BB\$1.00), which represent the Group's mid rate.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated income statement.

Changes in the fair value of monetary securities denominated in foreign currency classified as hold to collect and sell are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in the amortised cost are recognised in profit or loss and other changes in carrying amount are recognised in other comprehensive income. Translation differences on non-monetary items such as equities classified as hold to collect and sell financial assets are included in other comprehensive income.

(iii) Group companies

The results and financial position of all the Group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (a) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (b) income and expenses for each income statement are translated at average cover exchange rates for the financial year, and
- (c) all resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Exchange differences arising are recognised in other comprehensive income.

d. Derivative financial instruments

Derivative financial instruments including swaps are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured at their fair value. The method of recognising the resulting gain or loss depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged. Fair values are obtained from quoted market prices, discounted cash flow models and options pricing models as appropriate. All derivatives are carried as assets when their fair value is positive and as liabilities when negative.

e. Financial assets and financial liabilities

Under IFRS9 (policy applicable 1 October 2017)

(i) Financial assets

The Group has early adopted IFRS 9 and classifies its financial assets based on the following business models:

- Hold for trading
- Hold to collect and sell or
- Hold to collect

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

e. Financial assets and financial liabilities (continued)

(i) Financial assets (continued)

Based on these factors, the Group classifies its assets into one of the following three measurement categories:

- Amortised cost:

Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest (SPPI), and that are not designated at FVPL are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised and measured as described in note 3.a.v. Interest income from these financial assets is included in "Interest income" using the effective interest rate method.

- Fair value through other comprehensive income (FVOCI):

Financial assets that are held for collection of contractual cash flows and for selling the assets, where the asset cash flows represents solely payments of principal and interest, and that are not designated at FVPL, are measured at fair value through other comprehensive income (FVOCI). Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses on the instrument's amortised cost which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit and loss and recognized in "Net Investment Income". The interest income from these financial assets is included in "Interest Income" using the effective interest rate method.

- Fair value through profit or loss

Assets that do not meet the criteria for amortised cost or FVOCI are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognised in profit or loss and presented in the income statement within "Gains from investments securities" in the period in which it arises, unless it arises from debt instruments that were designated at fair value or which are not held for trading, in which case they are presented in "Investment Interest Income". Interest income from these financial assets is included in "Interest income" using the effective interest rate method.

a) Debt Instruments

Debt instruments are those instruments that meet the definition of a financial liability from the issuer's perspective, such as loans, government and corporate bonds.

Classification and subsequent measurement of debt instruments depend on:

- (i) the Group's business model for managing the asset; and
- (ii) the cash flow characteristics of the asset.

Group's Business model

The business model reflects how the Group manages the assets in order to generate cash flows. An assessment is made at a portfolio level and includes an analysis of factors such as:

- The stated objective and policies of the portfolio and the operation of those in practice. More specifically whether the Group's objective is solely to collect the contractual cash flows from the assets or to collect both the contractual cash flows and cash flows arising from the sale of the assets.
- Past experience on how the cash flows for these assets were collected.
- Determination of performance targets for the portfolio, how evaluated and reported to key management personnel.
- Managements identification of and response to various risks, which includes but not limited to, liquidity risk, market risk, credit risk, interest rate risk.
- Management classify its assets based on historical sales and forecasted liquidity requirements.

Arising out of the assessment the portfolios were deemed to have the business models identified as follows:

Hold to Collect	Hold to Collect & Sell	Hold for Trading
Corporate and Commercial Loans	OMO	Actively Traded (Capital Gains) Portfolio
Retail Loans	Treasury Notes	Floating NAV Funds*
Credit Cards	Bonds Issued by or guaranteed by Government of Trinidad & Tobago	Fixed NAV Funds** - cash & cash equivalents
Bonds Issued by or guaranteed by Government of Trinidad & Tobago (GOTT)	Eurobonds	
Non-Eurobonds maturing in greater than 3 years at recognition	Treasury Bills	
Loans & receivables	Canadian Treasury Bills	
Securities sold under repurchase agreements to clients and brokers	Non-Eurobonds maturing in less than 3 years at recognition	
Long Term Borrowings from brokers in the form of Total Return Swaps	Cash	
Medium Term Notes		

Solely payments of principal and interest (SPPI)

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Group assesses whether flows represent solely payment of principal and interest (SPPI test). In making this assessment, the Group considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

The Group reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be very infrequent and none occurred during the period.

b) Equity instruments

Equity instruments are instruments that meet the definition of equity from the issuer's perspective; that is, instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets. Examples of equity instruments include shareholdings with Visa and Caricris.

The Group subsequently measures all equity investments at fair value through profit or loss, except where the Group's management has elected, at initial recognition, to irrevocably designate an equity investment at fair value through other comprehensive income. These financial assets are presented within investment securities held to collect and sell. The Group's policy is to designate equity investments as FVOCI when those investments are held for purposes other than to generate investment returns. When this election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Impairment losses (and reversal of impairment losses) are not reported separately from other changes in fair value. Dividends, when representing a return on such investments, continue to be recognized in profit or loss as other income when the Group's right to receive payments is established.

Gain and losses on equity investments classified as FVPL are included in the consolidated income statement.

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

e. Financial assets and financial liabilities (continued)

(i) Financial assets (continued)

c) Impairment

The Group assesses on a forward-looking basis the expected credit losses (ECL) associated with its assets carried at amortised cost and FVOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Group recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.
- Note 3.a.v provides more detail of how the expected credit loss allowance is measured.

(i) Modification of loans

The Group sometimes renegotiates or otherwise modifies the contractual cash flows of loans to customers. When this happens, the Group assesses whether or not the new terms are substantially different to the original terms. The Group does this by considering, among others, the following factors:

- If the borrower is in financial difficulty, whether the modification merely reduces the contractual cash flows to amounts the borrower is expected to be able to pay.
- Significant extension of the loan term when the borrower is not in financial difficulty.
- Significant change in the interest rate.
- Insertion of collateral, other security or credit enhancements that significantly affect the credit risk associated with the loan.

If the terms are substantially different, the Group derecognises the original financial asset and recognizes a 'new' asset at fair value and recalculates a new effective interest rate for the asset. The date of renegotiation is consequently considered to be the date of initial recognition for impairment calculation purposes, including for the purpose of determining whether a significant increase in credit risk has occurred. However, the Group also assesses whether the new financial asset recognized is deemed to be credit-impaired at initial recognition, especially in circumstances where the renegotiation was driven by the borrower being unable to make the originally agreed payments. Differences in the carrying amount are also recognized in profit or loss as a gain or loss on derecognition.

If the terms are not substantially different, the renegotiation or modification does not result in derecognition, and the Group recalculates the gross carrying amount based on the revised cash flows of the financial asset and recognises a modification gain or loss in profit or loss. The new gross carrying amount is recalculated by discounting the modified cash flows at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets).

The impact of modifications of financial assets on the expected credit loss calculation is discussed in note 3.a.xiv.

(ii) Derecognition other than on a modification

Financial assets, or a portion thereof, are derecognised when the contractual rights to receive the cash flows from the assets have expired, or when they have been transferred and either (i) the Group transfers substantially all the risks and rewards of ownership, or (ii) the Group neither transfers nor retains substantially all the risks and rewards of ownership and the Group has not retained control.

The Group enters into transactions where it retains the contractual rights to receive cash flows from assets but assumes a contractual obligation to pay those cash flows to other entities and transfers substantially all of the risks and rewards. These transactions are accounted for as 'pass through' transfers that result in derecognition if the Group:

- (i) Has no obligation to make payments unless it collects equivalent amounts from the assets;
- (ii) Is prohibited from selling or pledging the assets; and
- (iii) Has an obligation to remit any cash it collects from the assets without material delay.

Collateral (shares and bonds) furnished by the Group under standard repurchase agreements and securities lending and borrowing transactions are not derecognised because the Group retains substantially all the risks and rewards on the basis of the predetermined repurchase price, and the criteria for derecognition are therefore not met. This also applies to certain securitisation transactions in which the Group retains a subordinated residual interest.

(ii) Financial liabilities

(i) Classification and subsequent measurement

In both the current and prior period, financial liabilities are classified as subsequently measured at amortised cost, except for:

- Financial liabilities at fair value through profit or loss: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in the trading booking) and other financial liabilities designated as such at initial recognition. Gains or losses on financial liabilities designated at fair value through profit or loss are presented partially in other comprehensive income (the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability, which is determined as the amount that is not attributable to changes in market conditions that give rise to market risk) and partially profit or loss (the remaining amount of change in the fair value of the liability). This is unless such a presentation would create, or enlarge, an accounting mismatch, in which case the gains and losses attributable to changes in the credit risk of the liability are also presented in profit or loss;
- Financial liabilities arising from the transfer of financial assets which did not qualify for derecognition, whereby a financial liability is recognised for the consideration received for the transfer. In subsequent periods, the Group recognises any expense incurred on the financial liability; and
- Financial guarantee contracts and loan commitments (see note 2.f).

(ii) Derecognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

The exchange between the Group and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortised over the remaining term of the modified liability.

f. Financial guarantee contracts and loan commitments

Financial guarantee contracts are contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due, in accordance with the terms of a debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities.

Financial guarantee contracts are initially measured at fair value and subsequently measured at the higher of:

- The amount of the loss allowance (calculated as described in note 3.a.iii); and
- The premium received on initial recognition less income recognised in accordance with the principles of IFRS 15.

Loan commitments provided by the Group are measured as the amount of the loss allowance (calculated as described in note 3.a.i.a). The Group has not provided any commitment to provide loans at a below-market interest rate, or that can be settled net in cash or by delivering or issuing another financial instrument.

For loan commitments and financial guarantee contracts, the loss allowance is recognised as a provision. However, for contracts that include both a loan and an undrawn commitment and the Group cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

f. *Financial guarantee contracts and loan commitments (continued)*

Under IAS 39 – Policies applicable for year ended September 2017

(i) *Financial assets*

The Bank classifies its financial assets in the following categories: loans and receivables and available-for-sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition and re-evaluates this designation at every reporting date.

(a) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- (i) Those that the Bank intends to sell immediately or in the short term and those that the entity upon initial recognition designates at fair value through profit or loss;
- (ii) Those that the entity upon initial recognition designates as available-for-sale;
- (iii) Those assets for which the holder may not recover all of its initial investment, other than because of credit deterioration, which shall be classified as available for sale

(b) *Available-for-sale financial assets*

Available-for-sale financial assets are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices or that are not classified as loans and receivables, held to maturity investments or financial assets at fair value through profit or loss.

(c) *Held to maturity*

Held-to-maturity investments are financial assets with fixed or determinable payments and fixed maturity dates where management has the positive intention and the ability to hold to maturity.

(ii) *Recognition and measurement*

Regular purchases and sales of financial assets are recognised on the trade-date – the date on which the Bank commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs for all financial assets not carried at fair value through profit or loss. Financial assets carried at fair value through profit or loss is initially recognised at fair value, and transaction costs are expensed in the income statement. Financial assets are derecognised when the rights to receive cash flows from the investments have expired or have been transferred and the group has transferred substantially all risks and rewards of ownership. Available-for-sale financial assets are subsequently carried at fair value. Loans and receivables are subsequently carried at amortised cost using the effective interest method.

Gains or losses arising from changes in the fair value of the 'financial assets at fair value through profit or loss' category are presented in the consolidated income statement within 'Other (losses)/gains – net' in the period in which they arise. Dividend income from financial assets at fair value through profit or loss is recognised in the consolidated income statement as part of other income when the Group's right to receive payments is established.

Changes in the fair value of monetary and non-monetary securities classified as available for sale are recognised in other comprehensive income.

When securities classified as available for sale are sold or impaired, the accumulated fair value adjustments recognised in equity are included in the statement of comprehensive income statement as 'Gains on disposal from investment securities'.

(iii) *Financial liabilities*

The Bank measures financial liabilities at amortised cost. Financial liabilities measured at amortised cost include deposits from banks or customers, debt securities in issue, other funding instruments and notes due to related parties.

(iv) *Recognition and de-recognition of financial instruments*

The Bank uses trade date accounting for regular way contracts when recording financial assets transactions. Financial assets that are transferred to third parties but do not qualify for derecognition are presented as assets pledged as collateral if the transferee has the right to sell or re-pledge them.

Financial assets are derecognised when the contractual right to receive the cash flows from these assets have ceased to exist or the assets have been transferred and substantially all the risks and rewards of ownership of the assets are also transferred.

Financial liabilities are derecognised when they have been redeemed or otherwise extinguished.

(v) *Determination of fair value*

For financial instruments traded in an active market, the determination of fair values of financial assets and liabilities is based on quoted market prices or dealer price quotations.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and these prices represent actual and regular occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indicators that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions. When a market becomes inactive, the valuation technique is the Group's internally developed model which is based on discounted cashflow analysis.

For all other financial instruments, fair value is determined using valuation techniques. In these techniques, fair values are estimated from observable data and unobservable data in respect of similar financial instruments, using models to estimate the present value of expected future cash flows or other valuation techniques using input existing at the year end.

The Bank uses an internally developed model which is generally consistent with other valuation models used in the industry. Valuation models are used to value unlisted debt securities and other debt securities for which the market has become or is illiquid. Some of the inputs of this model may not be market observable and are therefore based on assumptions.

h. *Impairment of financial assets*

(i) *Assets carried at amortised cost*

The Bank assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated.

Evidence of impairment may include indications that the debtors or a group of debtors is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganisation, and where observable data indicate that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

The Bank first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If the Bank determines that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, it includes the asset in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment. Additionally, no provisioning for impairment is recognised for assets that are supported by government guarantees even if the exposure is classified as "Non Performing".

The amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognised in the unconsolidated income statement. If a loan has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Bank may measure impairment on the basis of an instrument's fair value using an observable market price.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

For the purposes of a collective evaluation of impairment, financial assets are grouped on the basis of similar credit risk characteristics (i.e. on the basis of the Bank's grading process that considers asset type, industry, geographical location, collateral type, past-due status and other relevant factors). Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of the contractual cash flows of the assets in the group and historical loss experience for assets with credit risk characteristics similar to those in the group. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period on which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist. Estimates of changes in future cash flows for groups of assets should reflect and be directionally consistent with changes in related observable data from period to period (for example, changes in unemployment rates, property prices, payment status, or other factors indicative of changes in the probability of losses to the Bank and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by the Bank to reduce any differences between loss estimates and actual loss experience.

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

h. Impairment of financial assets (continued)

(i) Assets carried at amortised cost (continued)

When a loan is uncollectible, it is written off against the related provision for loan impairment. Such loans are written off after all the necessary procedures have been completed and the amount of the loss has been determined. If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the amount of the reversal is recognised in the consolidated income statement in impairment loss on loans net of recoveries.

(ii) Assets classified as available-for-sale

The Bank assesses at the year-end whether there is objective evidence that a financial asset or a group of financial assets is impaired. In the case of equity investments classified as available-for-sale, a significant or prolonged decline in the fair value of the security below its cost is considered an indicator that the assets are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss – measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in profit or loss – is removed from equity and recognised in the unconsolidated income statement. Impairment losses recognised in the unconsolidated income statement on equity instruments are not reversed through the unconsolidated income statement.

Debt securities are classified based on the criteria in Note 2 h (i). If, in a subsequent period, the fair value of a debt instrument classified as available-for-sale increases and the increase can be objectively related to an event occurring after the impairment loss was recognised in profit or loss, the impairment loss is reversed through the unconsolidated income statement.

(iii) Renegotiated loans

Loans that are either subject to collective impairment assessment or individually significant and whose terms have been negotiated are no longer considered to be past due but are treated as new loans. In subsequent years the asset is considered to be past due and disclosed only if renegotiated again.

The following table reconciles the presentation of investment securities under IAS 39 to the presentation for investment securities under IFRS 9

Measurement Basis	IAS 39 Classification	IFRS 9 Classification
Amortised cost	Held to maturity	Hold to collect
Amortised cost	Loans and receivables	Hold to collect
Fair value through other comprehensive income	Available for sale	Hold to collect and sell
Fair value through profit or loss	Fair value through profit or loss	Fair value through profit or loss

g. Impairment of non-financial assets

Intangible assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

h. Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position where there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

i. Sale and repurchase agreements and lending of securities

Securities sold subject to sale and repurchase agreements (repos) are retained on the consolidated statement of financial position as investment securities and the counterparty liability is included in other funding instruments.

Securities purchased under agreements to resell (reverse repos) are recorded as loans to other banks or customers as appropriate.

The difference between sale and repurchase price is treated as interest and accrued over the life of the repo agreement using the effective interest method.

j. Lease transactions

Leases are accounted for in accordance with IAS 17 and IFRIC 4. They are divided into finance leases and operating leases.

Leases in which a significant portion of the risks and methods of ownership are retained by another party, the lessor, are classified as operating leases. Leases of assets where the Group has substantially all the risk and rewards of ownership are classified as finance leases.

(i) The Group as the lessee

The Group has entered into operating leases where the total payments made under operating leases are charged to the consolidated income statement on a straight-line basis over the period of the lease. When an operating lease is terminated before the period has expired, any penalty payment made to the lessor is recognised as an expense in the period in which termination takes place.

When assets are held subject to a finance lease, an asset and liability is recognised in the consolidated statement of financial position at amounts equal at inception to the fair value of the leased asset or, if lower, the present value of the minimum lease payments. Lease payments are apportioned between the finance charge and the outstanding liability so as to achieve a constant rate on the finance balance outstanding.

The interest element of the finance cost is charged to the consolidated income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The plant and equipment acquired under finance leases is depreciated over the shorter of the useful life of the asset and the lease term.

(ii) The Group as the lessor

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method (before tax), which reflects a constant periodic rate of return on the remaining balance of the asset for each period.

k. Property, plant and equipment

Freehold premises are shown at fair value based on assessments performed by management or by independent valuers every three years, less subsequent depreciation for buildings. Valuations are performed with sufficient regularity to ensure that the fair value of a revalued asset does not differ materially from its carrying amount. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the assets and the net amount is restated to the revalued amount of the asset.

All other property, plant and equipment are stated at historical cost less depreciation. The valuation of freehold premises is reviewed annually to ensure it approximately equates to fair value. The valuations of freehold premises are re-assessed when circumstances indicate there may be a material change in value.

Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated income statement during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation of freehold premises are credited to fair value reserves in shareholders' equity. Decreases that affect previous increases of the same assets are charged against fair value reserves directly in equity; all other decreases are charged to the consolidated income statement. Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset, and the net amount is restated to the revalued amount of the asset.

Leasehold improvements and equipment are recorded at cost less accumulated depreciation.

Depreciation and amortisation are computed on all assets except land.

The provision for depreciation and amortisation is computed using the straight line method to allocate their cost or revalued amounts to their residual values over their estimated useful lives, as follows:-

Buildings	50 years
Equipment and furniture	4- 5 years
Computer equipment and motor vehicles	3- 5 years
Leasehold improvements	Amortised over the life of the lease

The assets' useful lives are reviewed and adjusted if appropriate at each reporting date. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount may not be recoverable.

Notes to the Consolidated Financial Statements *(continued)*
(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

k. *Property, plant and equipment (continued)*

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. The recoverable amount is the higher of the assets fair value less cost to sell and value in use. Gains and losses on disposal of property, plant and equipment are determined by reference to their carrying amount and are recognised within the consolidated income statement. When revalued assets are sold, the amounts included in fair value reserves are transferred to retained earnings.

l. *Income tax*

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated income statement, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Bank and its subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill; deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax liabilities are provided on taxable temporary differences arising from investments in subsidiaries, associates and joint arrangements, except for deferred income tax liability where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future. Generally the Group is unable to control the reversal of the temporary difference for associates. Only where there is an agreement in place that gives the Group the ability to control the reversal of the temporary difference not recognised.

Deferred income tax assets are recognised on deductible temporary differences arising from investments in subsidiaries, associates and joint arrangements only to the extent that it is probable the temporary difference will reverse in the foreseeable future and there is sufficient taxable profit available against which the temporary difference can be utilised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

m. *Employee benefits*

(i) *Pension plans*

The Group operates a defined benefit plan, which is a pension plan that defines an amount of pension benefits that an employee will receive on retirement, usually dependent on one or more factors, such as age, years of service and compensation. This pension plan is funded by payments from employees and by the Group, taking account of the recommendations of independent qualified actuaries.

Typically defined benefit plans define an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is calculated based on cash outflows allocated to current or prior periods using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation. In countries where there is no deep market in such bonds, the market rates on government bonds are used.

(ii) *Profit sharing and bonus plans*

The Group recognises a liability and an expense for bonuses and profit-sharing, based on a formula that takes into consideration the profit attributable to the Group's shareholders after certain adjustments. The Group recognises a provision where contractually obliged or where there is a past practice that has created a constructive obligation.

(iii) *Employee share ownership plan*

The Group established a cash-settled based remuneration plan for its employees. A liability is recognised for the fair value of the cash-settled transactions. The fair value is measured initially and at each reporting date up to and including the settlement date, with changes in the fair value recognised in the income statement. The fair value is expensed over the period until the vesting date with recognition of a corresponding liability.

n. *Cash and cash equivalents*

For purposes of the consolidated statement of cash flows, cash and cash equivalents comprise of cash balances on hand, deposits with other banks and short-term highly liquid investments with original maturities of three months or less when purchased net of balances "due to other banks".

o. *Interest income and expense*

Interest income and interest expense are recognised in the consolidated income statement for all interest bearing instruments on an accrual basis using the effective interest method based on the initial carrying amount. Interest income includes coupons earned on fixed income investments, loans and accrued discount and premium on treasury bills and other discounted instruments. When a loan and receivable is impaired, the Group reduces the carrying amount to its recoverable amount (i.e. net of the expected credit loss provision), being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset (i.e. its amortised cost before any impairment allowance) or the amortised cost of a financial liability. The calculation does not consider expected credit losses and include transaction costs, premium, discounts and fees and point paid or received that are integral to the effective interest rate, such as origination fees.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest used to discount the future cashflows for the purpose of measuring the impairment loss.

For financial assets that are credit impaired (stage 3), interest income is calculated by applying the effective interest rate to the carrying value net of the expected credit loss provision.

p. *Fee and commission income*

Fees and commissions are recognised on an accrual basis, when the service has been provided. Loan commitment fees for loans that are likely to be drawn down are deferred (together with related direct cost) and recognised as an adjustment to the effective interest rate on the loan. Loan syndication fees are recognised as revenue when the syndication has been completed and the Group has retained no part of the loan package for itself or has retained part at the same effective interest rate as the other participants. Commissions and fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the arrangement of the acquisition of shares or other securities or the purchase or sale of businesses are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts usually on a time apportionate basis.

Asset management fees related to investment funds are recognised rateably over the period the service is provided and accrued in accordance with pre-approved fee scales. The same principle is applied for wealth management, financial planning and custody services that are continuously provided over an extended period of time. Performance linked fees or fee components are recognised when the performance criteria are fulfilled.

q. *Dividend income*

Dividends are recognised in the consolidated income statement when the entity's right to receive payment is established.

r. *Borrowings*

Borrowings are recognised initially at fair value, being their issue proceeds net of transaction costs incurred. Subsequently, borrowings are stated at amortised cost and any difference between proceeds net of transactions costs and the redemption value is recognised in the consolidated income statement over the period of the borrowings using the effective interest method.

s. *Acceptances*

Acceptances comprise undertakings by the Group to pay bills of exchange drawn on customers. The Group expects most acceptances to be settled simultaneously with the reimbursement from the customers. Acceptances are accounted for as off-balance sheet transactions and are disclosed as contingent liabilities and commitments.

t. *Dividend distribution*

Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Bank's Board of Directors. Dividends for the year, which are declared after the year end, are disclosed in the subsequent events note when applicable.

u. *Preference shares*

Preference shares are non-convertible and non-redeemable are classified as equity.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

v. Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of the obligation as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditure expected to be required to settle the obligation using a pre tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as interest expense.

w. Intangible assets

Intangible assets comprise separately identifiable items arising from business combinations, computer software licenses and other intangible assets. Intangible assets are recognised at cost. The cost of an intangible asset acquired in a business combination is its fair value at the date of acquisition. Intangible assets with a definite useful life are amortised using the straight line method over the period that the benefits from these assets are expected to be consumed, generally not exceeding 20 years. Intangible assets with an indefinite useful life are not amortised. At each date of the consolidated statement of financial position, intangible assets are reviewed for indications of impairment or changes in estimated future economic benefits. If such indications exist, the intangible assets are analysed to assess whether their carrying amount is fully recoverable. An impairment loss is recognised if the carrying amount exceeds the recoverable amount.

The Group chooses to use the cost model for the measurement after recognition.

Intangible assets with indefinite useful life are tested annually for impairment and whenever there is an indication that the asset may be impaired.

(i) Goodwill

Goodwill arises on the acquisition of subsidiaries and represents the excess of the consideration transferred over the Group's interest in net fair value of the net identifiable assets, liabilities and contingent liabilities of the acquiree and the fair value of the non-controlling interest in the acquiree.

For the purpose of impairment testing, goodwill acquired in a business combination is allocated to each of the CGUs, or groups of CGUs, that is expected to benefit from the synergies of the combination. Each unit or group of units to which the goodwill is allocated represents the lowest level within the entity at which the goodwill is monitored for internal management purposes. Goodwill is monitored at the operating segment level.

Goodwill impairment reviews are undertaken annually or more frequently if events or changes in circumstances indicate a potential impairment. The carrying value of goodwill is compared to the recoverable amount, which is the higher of value in use and the fair value less costs of disposal. Any impairment is recognised immediately as an expense and is not subsequently reversed.

(ii) Other Intangible assets

Other intangible assets are initially recognised when they are separable or arise from contractual or other legal rights, the cost can be measured reliably and in the case of intangible assets not acquired in a business combination, where it is probable that future economic benefits attributes to the assets with flow from their use. The value of intangible assets which are acquired in a business combination is generally determined using income approach methodologies such as the discounted cash flow method.

Other intangible assets are stated at cost less amortisation and provisions for impairment, if any, plus reversals of impairment, if any. They are amortised over their useful lives in a manner that reflects the pattern to which they contribute to future cash flow.

(iii) Computer software

Costs associated with maintaining computer software programmes are recognised as an expense when incurred. However, expenditure that enhances or extends the benefits of computer software programmes beyond their original specifications and lives is recognised as a capital improvement and added to the original cost of the software. Computer software development costs are recognised as assets when the following criteria are met:-

- It is technically feasible to complete the software and use it
- Management intends to complete the software and use it
- There an ability to use the software
- Adequate technical, financial and other resources to complete the development and to use it
- The expenditure attributable to the software during its development can be reliably measured.

The software development costs are amortised using the straight-line method over their useful lives but not exceeding a period of three years.

x. Fiduciary activities

The Group acts as trustees and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Group (Note 3.d).

y. Earnings per share

Earnings per share is calculated by dividing the profit attributable to the equity holders, by the weighted average number of ordinary shares in issue during the year.

z. Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the steering committee that makes strategic decisions.

2.1 Change in accounting policies

The Group has adopted IFRS 9 as issued by the IASB in July 2014, with a date of transition of 1 October 2017, which resulted in changes in accounting policies and adjustments to the amounts previously recognised in the consolidated financial statements.

As permitted by the transitional provisions of IFRS 9, the Group elected not to restate comparative figures. Any adjustments to the carrying amounts of financial assets and liabilities at the date of transition were recognised in the opening retained earnings and other reserves of the current period.

Consequently, for notes disclosures, the consequential amendments to IFRS 7 disclosures have also only been applied to the current period. The comparative period notes disclosures repeats those disclosures made in the prior year.

The adoption of IFRS 9 has resulted in changes in our accounting policies for recognition, classification and measurement of financial assets and financial liabilities and impairment of financial assets. IFRS 9 also significantly amends other standards dealing with financial instruments such as IFRS 7 "Financial Instruments: Disclosure".

The impact of the adoption of IFRS 9 on the Group is as follows:-

(a) Classification and measurement of financial instruments in accordance with IAS 39 & IFRS 9

Financial assets	IAS 39		IFRS 9	
	Measurement	Carrying amount \$'000	Measurement	Carrying amount \$'000
Cash and due from banks	Amortised Cost	3,525,470	Amortised Cost	3,525,470
Cash – Treasury Bills	Amortised Cost	159,608	FVOCI	151,941
Statutory Deposit with Central Banks	Amortised Cost	—	Amortised Cost	—
Hold to collect and sell - debt	FVOCI	2,045,806	Amortised Cost	1,919,513
Hold to collect and sell -debt	FVOCI	10,369,918	FVOCI	10,349,095
Hold to collect and sell - equity	FVOCI	50,813	FVOCI	50,813
Hold to collect and sell - equity	FVOCI	396	FVPL	396
Hold to collect	Amortised Cost	2,736,791	Amortised Cost	2,572,407
Loans to customers	Amortised Cost	14,434,583	Amortised Cost	14,554,900
Hold to collect	Amortised Cost	485,308	FVOCI	485,308

There were no changes in the measurement and classification of financial liabilities.

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

2 Summary of significant accounting policies (continued)

2.1 Change in accounting policies (continued)

(b) Reconciliation of statement of financial position from IAS 39 to IFRS 9

The Group performed a detail analysis of its business models for managing financial assets and analysis of their cash flow characteristics in line with the criteria outlined in note 2)e) above.

The following table reconciles the carrying amount of the financial assets from their previous measurement category in accordance with IAS 39 to their new measurement categories upon transition to IFRS 9 on 1 October 2017:-

Financial assets	IAS 39 carrying amount 30 September 2017	Reclassifications	ECL Remeasurements	IFRS 9 Carrying amount 1 October 2017
Fair value through other comprehensive income				
Hold to collect and sell - debt				
Opening balance	12,433,633	(1,379,996)	—	11,053,637
Provision for impairment	(17,909)	—	(49,384)	(67,293)
Closing balance	12,415,724	(1,379,996)	(49,384)	10,986,344
Hold to collect and sell - equity				
Opening balance	51,209	(396)	—	50,813
Closing balance	51,209	(396)	—	50,813
Total amortised cost	12,466,933	(1,380,392)	(49,384)	11,037,157
Amortised cost				
Cash and due from banks:				
Opening balance	3,685,077	(159,608)	—	3,525,469
Provision for impairment	—	—	—	—
Closing balance	3,685,077	(159,608)	—	3,525,469
Hold to collect				
Opening balance	3,228,053	1,539,237	(52,606)	4,714,684
Provision for impairment	(5,954)	—	(216,810)	(222,764)
Closing balance	3,222,099	1,539,237	(269,416)	4,491,920
Loans and advances				
Opening balance	14,740,622	—	—	14,740,622
Provision for impairment	(306,039)	—	120,317	(185,722)
Closing balance	14,434,583	—	120,317	14,554,900
Total amortised cost	21,341,759	1,379,629	(149,099)	22,572,289
Fair value through profit or loss				
Opening balance	655	396	—	1,051
Provision for impairment	—	—	—	—
Closing balance	655	396	—	1,051

(c) The following explains how applying the new classification requirements of IFRS 9 led to changes in the classification of certain financial assets held by the Group as shown in the table above:-

(a) Securities within the liquidity portfolio

Based on the business model for securities within the Group's liquidity portfolio, the majority are held to collect the contractual cash flows and sell, and are therefore classified under as Fair Value through Other Comprehensive Income (FVOCI). Securities for which there is not an active market and which are not expected to be sold to meet liquidity requirements were classified within the Hold to Collect business model.

(b) Syndicated loans

The Group sometimes acted as a lead arranger of a syndicated loan facility to one of its major customers. The facility amount requested by the customer may exceeded the Group's limit for single client exposure under the Group credit risk policy and the FIA, so the facility will be approved with the condition that the excess amount will be sold in the short to medium term. Under IFRS 9, this amount exceeding the Group's limit will be classified as part of a hold to sell business model and measured at FVPL. The balance of the loan will be measured at amortised cost in its entirety.

(d) The following table analyses the impact, net of tax, of transition to IFRS 9 on reserves and retained earnings. The impact relates to the fair value reserve and retained earnings. There is no impact on other components of equity.

	\$'000
Fair value reserve	
Closing Balance under IAS 39 as at 30 September 2017	753,975
Reclassification of investment securities (debt) from AFS to amortised cost	(38,453)
Opening Balance under IFRS 9 (1 October 2017)	715,522
Retained earnings	
Closing Balance under IAS 39 as at 30 September 2017	4,306,459
Foreign Exchange	(20)
Recognition of expected credit losses under IFRS 9 (including loan commitments and financial guarantee contracts)	(145,877)
Opening Balance under IFRS 9 (1 October 2017)	4,160,562

The following table reconciles the closing impairment allowance for financial assets in accordance with IAS 39 and provision for loan commitments and financial guarantees contracts in accordance with IAS 37 as at 30 September 2017, to the opening ECL allowances determined in accordance with IFRS 9 as at 1 October 2017.

Impairment allowance	IAS 39 carrying amount 30 September 2017	Reclassifications	Remeasurements	IFRS 9 Carrying amount 1 October 2017
Loans and advances to customers	306,039	—	(120,317)	185,722
	306,039	—	(120,317)	185,722
Investment - debt securities				
Hold to collect and sell	17,909	—	49,384	67,293
Hold to collect	5,954	—	216,810	222,764
	23,863	—	266,194	290,057
Total	329,902	—	145,877	475,779

The ECL on the financial guarantees are nil, as all guarantees executed are secured by cash. The newly committed assets assessments are based on the clients risk profile, PDs, LGD and collateral position. There were no exposure, as a result they were classified under stage 1 with no ECL (Note 3.c.iii).

3 Financial risk management

The Group's activities expose it to a variety of financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and operational risks are an inevitable consequence of being in business. The Group's aim is therefore to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Group's financial performance.

The Group's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Group regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Group's risk management framework. To assist the Board of Directors in fulfilling its duties, two Board Sub-Committees are in place to monitor and report to the Board of Directors on the overall risks within the Group - the Board Enterprise Risk Management Committee and the Board Credit Committee; and two Senior Management Committees - the Senior Management Enterprise Risk Committee and the Asset Liability Committee.

The Group Enterprise Risk Management Unit, headed by the Group Chief Risk Officer, reports to both Sub-Committees through the Senior Management Enterprise Risk Management Committee. This unit is responsible for the management, measurement, monitoring and control of credit, market and operational risks for the Group through the Group Credit Risk Administration Unit, Group Market Risk Unit, Group Operational Risk and Controls Unit. The unit also facilitates the monitoring of the Group's risk profile in relation to its risk appetite and the impact of developments in the aforementioned risk areas on strategy and how strategy should be adjusted in light of these developments.

The Asset Liability Committee's (ALCO) role is to manage and monitor the policies and procedures that address the financial risks associated with changing interest rates, foreign exchange rates and any factors that can affect the Group's liquidity. The ALCO seeks to limit risk to acceptable levels by monitoring and anticipating possible pricing differences between assets and liabilities across the Group via the Group Treasury and International Trade Centre. The Group Treasury and International Trade Centre's primary role and responsibility is to actively manage the Group's liquidity and market risks. The ALCO is also supported in some specific areas of activity by the Market Risk Committee.

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

Risk management framework (continued)

As part of its mandate, the Board establishes written principles for overall risk management, as well as ensuring that policies are in place covering specific areas of risk, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments. In addition, the Group Internal Audit Department is responsible for the independent review of risk management and the control environment, and reports its findings and recommendations to the Board Audit Committee.

The most significant important types of risk are credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate risk and other price risks including commodity and equity risk.

a. Credit risk

Credit risk is the risk of suffering financial loss, should any of the Group's customers, clients or market counterparties fail to fulfil their contractual obligations to the Group. Credit risk arises mainly from interbank, commercial and consumer loans and advances, and loan commitments arising from such lending activities, but can also arise from credit enhancement provided, financial guarantees, letters of credit, endorsements and acceptances.

The Group is also exposed to other credit risks arising from investments in debt securities and other exposures arising from its trading activities ('trading exposures') including non-equity trading portfolio assets and derivatives as well as settlement balances with market counterparties and reverse repurchase agreements.

Credit risk is the single largest risk for the Group's business; management therefore carefully manages its exposure to credit risk. The credit risk management and control are centralised in a Group Credit Risk Management team which reports regularly to the Group Chief Risk Officer and the Board Credit Committee.

(i) Credit risk management

In its management of credit risks, the Group has established an organisational structure which supports the lending philosophy of the Group. This structure comprises the Board of Directors, the Board Credit Committee (BCC), Senior Management Enterprise Risk Committee (SMERC), the Group Chief Risk Officer (GCRO), the Group Credit Risk Management Unit and the Internal Audit Department. The Board of Directors maintains general oversight to ensure that policies and procedures are consistent with the strategic direction and credit philosophy of the Group and that they serve to bring the required level of protection over assets that are exposed to credit risks. To facilitate day to day decision making and timely implementation of decisions, the Board has delegated authority for specific areas to specific committees and/or officers with an appropriate reporting system to the Board. The BCC focuses primarily on credit risk appetite and in so doing sanctions amendments to credit policies, delegation of lending authority to senior management and credit requests exceeding the authority of management. The SMERC together with the GCRO monitors the effectiveness of credit policies and procedures and may direct changes to strategies to improve the effectiveness of policies. The major focus of the Credit Risk Management Unit is to formulate credit policies, monitor compliance with them and on a continuous basis to assess their relevance to the changing business environment. Most of these policies are established and communicated through the Group's written Credit Policy Manual. This document sets out in detail the current policies governing the lending function and provides a comprehensive framework for prudent risk management of the credit function. Major areas of focus are General Credit Policy Guidelines, Exercise of Lending Authority, Credit Review Process, Credit Risk Rating and Classification System, among others.

(a) Loans and advances (including loan commitments and guarantees)

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The Group measures credit risk using Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD). This is similar to the approach used for the purposes of measuring Expected Credit Loss (ECL) under IFRS 9 (note 3.a.iv).

(ii) Credit risk grading

The Group uses internal credit risk gradings that reflect its assessment of the risk profile of the individual counterparties. The Group uses internal rating models tailored to the various categories of counterparty. Borrower and loan specific information collected at the time of application (such as asset base, credit history and industry type for corporate/commercial exposures) is fed into this rating model. External data such as credit bureau scoring information is used for individual borrowers. In addition, the models enable expert judgement to be fed into the final internal credit rating for each exposure. This allows for considerations which may not be captured as part of the other data inputs into the model.

The credit grades are calibrated such that the risk of default increases exponentially at each higher risk grade. For example, this means that the difference in the PD between a 1-4 rating grade is lower than the difference in the PD between a 5 and 6 rating grade.

The following are additional considerations for other types of portfolio held by the Group:

Corporate/Commercial

For corporate/commercial business, the rating is determined at the borrower level. The business's relationship management team will incorporate any updated or new information/credit assessments into the credit system on an ongoing basis. In addition, the relationship management team will also update information about the creditworthiness of the borrower every year from sources such as financial statements. This will determine the updated internal credit rating and a subsequent PD is derived based on historical default experience of the grade.

Treasury and investments

For debt securities in the Treasury and the Investment portfolios, external rating agency credit grades are used.

These published grades are continuously monitored and updated. The PD's associated with each grade are determined based on realised default over the prior 12 months, as published by the rating agency.

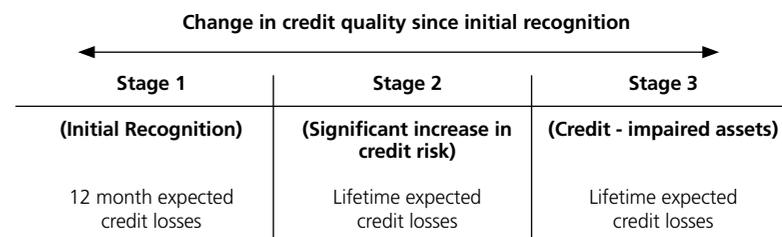

(iii) Expected credit loss measurement

IFRS 9 outlines a 'three stage' model; for impairment based on changes in credit quality since initial recognition as summarized below:

- A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1 and has its credit risk continuously monitored by the Group.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit-impaired. Please refer to note 3.a.v for a description of how the Group determines when a significant increase in credit risk has occurred.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'. Please refer to note 3.a.vi for a description of how the Group defines credit-impaired and default.
- Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses within the next 12 months. Instruments in Stages 2 or 3 have their ECL measured based on expected credit losses on a lifetime basis. Please refer to note 3.a.vii for a description of inputs, assumptions and estimation techniques used in measuring the ECL.
- A pervasive concept in measuring ECL in accordance with IFRS 9 is that it should consider forward-looking information. Note 3.a.viii includes an explanation of how the Group has incorporated this in its ECL model.
- Purchased or originated credit-impaired financial assets are those financial assets that are credit-impaired on initial recognition. Their ECL is always measured on a lifetime basis (Stage 3).

Further explanation is also provided of how the Group determines appropriate groupings when ECL is measured on a collective basis (refer to note 3.a.ix).

The following diagram summarises the impairment requirements under IFRS 9 (other than purchased or originated credit-impaired financial assets):

Significant increase in credit risk (SICR)

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following criteria have been met:

Loans - FCTT

Criteria	Retail Loans (incl Credit Cards)	Commercial/Corporate Loans
Relative Measure	n/a	3- or higher- Downgrades such that the BRR gets to 4 or lower 4+ and lower- Three notches downgrade on the internal scale
Absolute Measure	31 days past due/ Classified Special Mention	31 days past due/ Classified Special Mention

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

a. Credit risk (continued)

(iii) Expected credit loss measurement

(Significant increase in credit risk (SICR) (continued))

Loans – FCBB

Criteria	Retail Loans (incl Credit Cards)	Commercial/Corporate Loans
Absolute Measure	31 days past due/ Classified Special Mention	31 days past due/ Classified Special Mention

Investments – Group wide

Criteria	Investment Grade Portfolio	Single "B" Speculative Grade Portfolio
Absolute Measure	PD - 15% or higher	PD - 25% or higher
AND	AND	AND
Relative Measure	One notch downgrade (internal rating scale)	One notch downgrade (internal rating scale)
OR	OR	OR
Special Consideration	Eurobonds with Trigger 3 Breaches	Eurobonds with Trigger 3 Breaches

The Group has not used the low credit risk exemption for any financial instruments in the year ended 30 September 2018.

With respect to the cure for SICR, the group considers a significant decrease in credit risk has occurred when the following happens:

Loans

Retail Loans (incl Credit Cards)	Commercial/Corporate Loans
Payments received for six months consecutively	Payments received for six months consecutively
Loan classification upgrade to Pass	Loan classification upgrade to Pass
	Borrower's BRR returned to original rate just prior to the SICR

Investments

Criteria	Investment Grade Portfolio	Single "B" Speculative Grade Portfolio
Absolute Measure	PD- 12.5% or lower	PD -25% or lower
AND	AND	AND
Relative Measure	Credit rating reverts to level just prior being deemed an having an SICR	One notch downgrade (internal rating scale)
OR	OR	OR
Special Consideration	No credit stop loss breaches	No credit stop loss breaches

(iv) Definition of default and credit-impaired assets

The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when it meets one or more of the following criteria:

- Quantitative criteria

The borrower is more than 90 days past due on its contractual payments.

- Qualitative criteria

The borrower meets unlikelihood to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower formally files for bankruptcy or there is a commencement of foreclosure proceedings.

- The obligation is classified Doubtful or worse as per the Group's classification process.
- A modification to the terms and conditions of the original agreement that would not normally be considered is executed
- Restructure proceedings or an indication of the intention to restructure is initiated by the issuer (investments only).

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD), throughout the Group's expected loss calculations.

A loan instrument is considered to no longer be in default (i.e. to have cured) when it no longer meets any of the default criteria for a consecutive period of six months.

An investment instrument is considered to no longer be in default (i.e. to have cured) when it has been restructured. An exception exists for credit impaired facilities at origination.

(v) Measuring ECL - Explanation of inputs, assumptions and estimation techniques

The Expected Credit Loss (ECL) is measured on either a 12-month (12M) or lifetime basis depending on whether a significant increase in credit risk has occurred since initial recognition or whether an asset is considered to be credit-impaired. Expected credit losses are the discounted product of the Probability of Default (PD), Exposure at Default (EAD), and Loss Given Default (LGD), defined as follows:

- The PD represents the likelihood of a borrower defaulting on its financial obligation (as per "Definition of default and credit-impaired" above), either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation.
- EAD is based on the amounts the Group expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). For example, for a revolving commitment, the Group includes the current drawn balance plus any further amount that is expected to be drawn up to the current contractual limit by the time of default, should it occur.
- Loss Given Default (LGD) represents the Group's expectation of the extent of loss on a defaulted exposure. LGD varies by seniority of claim and product type, while the availability of collateral is factored before LGD is considered. A robust system for recovering on all delinquent facilities managed by specialized units ensures that early measures are taken to contain loss. The recovery on the various products managed by the Group are recorded and this historical information is used to determine LGD. LGD is expressed as the percentage of loss expected to be made if the default occurs over the remaining expected lifetime of the loan.

The ECL is determined by multiplying the PD, LGD and EAD after taking into consideration the discounted present value of the EAD and collateral enhancements. The EAD is determined by reducing the outstanding balance from the discounted collateral value. The cost of disposal of the collateral item is factored together with the time frame for disposal before discounting to present values. The discount rate used in the ECL calculation is the original effective interest rate.

The lifetime and 12-month PDs are determined differently for loans and investments. The investments PDs are taken from the Standard & Poors (S&P) transition matrix, while the loans' PDs are derived from the historical experience of the Group over a period, calculated using a vintage analysis methodology. The EAD is considered as follows:

- For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12 month or lifetime basis. This will also be adjusted for any expected overpayments made by a borrower. Early repayment assumptions are also incorporated into the calculation.
- For revolving products, the exposure at default is calculated by taking current drawn balance and adding a "credit conversion factor" which allows for the expected drawdown of the remaining limit by the time of default. These assumptions vary by product type and current limit utilisation band, based on an analysis of the product's usage over a two year period. (Note 3.a.vi)
- The 12 month and lifetime LGDs are determined based on the factors which impact the recoveries made post default. These vary by product type and are influenced by the collection strategies of the specialist units managing the process. (Note 3.a.vi)

(vi) Forward-looking information incorporated in the ECL models

The calculation of ECL incorporates forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

Loan portfolio

For the scorecard model, the macro economic factors and the weights attached to them were chosen based on management's judgment and experience. Weights were assigned to distinguish those factors which would have a higher impact when compared to others. We note that one set of weights was developed for the Retail Loan Book and another set of weights for the Corporate/Commercial Loan book since in management's view the impact of macroeconomic factors differ significantly for these two categories of loans.

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

a. Credit risk (continued)

(vi) Forward-looking information incorporated in the ECL models (continued)

Loan portfolio (continued)

For each jurisdiction four macro-economic factors were used, three of them being consistent in all countries and one indicator being flexed based on the economic activity impact on the country. The Unemployment rate, real GDP growth and Inflation were seen to have impact on default in all countries and the Oil Price, Tourist Arrivals and FX Spot were used as the country specific indicator for Trinidad & Tobago, Barbados, and Cost Rica & LATAM respectively. In our assessment of the retail loan book unemployment was seen to have a direct impact on recoverability and thus weighted heavily on the retail portfolio. Real GDP Growth influenced the corporate/commercial loan book and was the heavier weighted factor for that portfolio. In management's view inflation would also have an impact on loan default and while not as significant as some of the other factors it was also included in the assessment.

Outlooks were provided for each of these variables to derive a weighted adjustment factor that was then applied to the loans to reflect the macro-economic effect.

The tables below show the macroeconomic factors selected and attendant weights:

RETAIL LOAN PORTFOLIO

Trinidad and Tobago	Barbados	Weight
Unemployment rate	Unemployment rate	0.7
Real GDP Growth	Real GDP Growth	0.1
Inflation	Inflation	0.05
Oil Price	Tourist Arrivals	0.15
Total		1

CORPORATE COMMERCIAL LOAN PORTFOLIO

Trinidad and Tobago	Barbados	Costa Rica and LATAM	Weight
Unemployment rate	Unemployment rate	Unemployment Rate	0.1
Real GDP Growth	Real GDP Growth	Real GDP Growth	0.7
Inflation	Inflation	Inflation	0.05
Oil Price	Tourist Arrivals	FX Spot	0.15
Total			1

The weighting assigned to each economic scenario as at September 30 2018 were as follows:-

	Base	Upside	Downside
Loans	80%	10%	10%

The weighting assigned to each economic scenario as at September 30 2017 were as follows:-

	Base	Upside	Downside
Loans	80%	10%	10%

The Group also made the following key assumptions in its assessment:-

Credit Cards

The average lifetime of credit card facilities were calculated as 6 years for FCTT and 7 years for FCBB. In determining the tenor of these facilities an average of the accounts in existence to reporting date, together with the accounts closed over the last ten years was used to calculate the average life.

Overdrafts

In order to determine the lifetime of the consumer overdraft facilities an average of all overdrafts opened and closed to date was calculated. This calculation resulted in the identification of 6 years & 7 years for personal and staff overdrafts respectively.

Recovery Rates

Recovery rates used on loans represents the actual historical experience since inception of recovery on charged-off accounts by product type. These accounts have no attached collateral, however a robust system is in place for tracking collections on these loans. In the instance of loans that are on booked in jurisdictions outside of Trinidad & Tobago and Barbados, sufficient recovery information was not available therefore the Trinidad recovery experience was applied to those loans of other jurisdictions.

Credit Conversion Factors

Used to determine the undrawn element of revolving facilities, the credit conversion factors were calculated using the quarterly exposure for overdrafts and monthly exposure for credit cards over a two (2) year period. A maximum average of the quarterly or monthly exposure was taken for loans or credit cards respectively.

Determination of Macroeconomic Scenarios and Probabilities

For each sovereign, Management determine a macroeconomic driver, which is statistically linked to the credit risk of that sovereign. Once this lead indicator is established, correlation analysis is conducted between this macroeconomic indicator and key sovereign credit risk metrics, where the sign and strength of correlation coefficients determine which are most significant. These (three) selected sovereign credit risk metrics are determined based on their importance as key sovereign credit rating drivers and are comprised of both fiscal and debt indicators as well as measures of external liquidity. To quantify the impact of the lead macroeconomic driver on each of the credit risk metric, OLS regression is conducted. To establish the alternative scenarios required by IFRS 9, the lead macroeconomic driver is 'shocked', such that the official forecast for each year moves up and down by a multiple of the historical standard deviation to establish a best- and worse-case. Once these new values are derived, they are inputted into the OLS regression equation for each of the key sovereign credit risk metric to quantify how credit risk changes in the alternative scenarios.

These data points are used in the determination of a credit rating for the sovereign in each of the different scenarios for the forecasted period. To assign probabilities, we adopt the Standard and Poor's Transition Matrix, which is computed by comparing the issuer ratings at the beginning of a period with the ratings at the end of the period. This essentially provides us with a probability of moving from the current credit rating to the forecasted rating.

Credit ratings were forecasted for the next three years using the macro-economic overlay model. The weightings applied to the forecasted ratings were 60% for year 1, 20% each for year 2 and 3. These weightings were determined based on management's judgment and experience.

Investments

These economic variables and their associated impact on the PD, EAD and LGD vary by financial instrument. Management judgment has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by the Research & Analytics team on a periodic basis and provide the best estimate view of the economy over the next three years. After three years, to project the economic variables out for the full remaining lifetime of each instrument, a mean reversion approach has been used, which means that economic variables tend to either a long run average rate (e.g. for unemployment) or a long run average growth rate (e.g. GDP) over a period of two to five years. The impact of these economic variables on the PD, EAD and LGD has been determined by performing statistical regression analysis to understand the impact changes in these variables have had historically on default rates and on the components of LGD and EAD.

In addition to the base case scenario the Research & Analytics team also provided other possible scenarios along with scenario weightings. The number of other scenarios used was set with the only exception being the addition of a fourth scenario if the base and current differed. The number of scenarios and their attributes are reassessed at each reporting date. The scenario weightings are determined by a combination of statistical analysis and expert credit judgement, taking account of the range of possible outcomes each chosen scenario is representative of.

Country specific indicators were used for different countries around the world in the sovereign overlay model.

Economic assumptions

The most significant period-end assumptions used for the ECL estimate as at 30 September 2018 are set out below. The scenarios base, best and "worst" were used for the investment portfolios.

Sensitivity analysis

The most significant assumptions affecting the ECL allowance are as follows:

Retail portfolios

- (i) Unemployment rate, given its impact on secured and unsecured borrowers' ability to meet their contractual repayments.

Corporate/Commercial portfolios

- (i) GDP, given the significant impact on companies performance and collateral valuations;

Notes to the Consolidated Financial Statements (continued)
(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

a. Credit risk (continued)

(vi) Forward-looking information incorporated in the ECL models (continued)

Set out below are the changes to the ECL as at 30 September 2018 that would result from reasonably possible changes in these parameters from the actual assumptions used in the Group's economic variable assumptions (for example, the impact on ECL of increasing the estimated unemployment rate by [X]% in each of the base, best and worst):

Retail portfolio

	PDs		
	-1% '000	No Change '000	1% '000
	40,029	—	40,029

Commercial & Corporate portfolio

	LGDs		
	-5% '000	No Change '000	5% '000
	2,854	—	2,854

(vii) Grouping of instruments for losses measured on a collective basis

For expected credit loss provisions modelled on a collective basis, a grouping of exposures is performed on the basis of shared risk characteristics, such that risk exposures within a group are homogeneous.

In performing this grouping, the characteristic of the risk profile was taken into consideration. The grouping was done for one main product type as outlined below:

Credit Cards Groupings for collective measurement

- All Stages

The following exposures are assessed individually:
Retail – All stages
Corporate/Commercial – All stages
Investments

The appropriateness of groupings is monitored and reviewed on a periodic basis by the Credit Risk Management team.

(viii) Risk limit control and mitigation policy

The Group structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, groups of borrowers, industry and country segments. The Group monitors its concentration of credit exposure so that no single borrower or industry default will have a material impact on the Group. These limits are implemented and monitored by the Credit Risk Management Unit via the stipulations of the Group Credit Policy Manual. In instances where it is strategically beneficial and adequately documented, the Group would seek approval on an exception basis for variation to its standard approved limits from the Board of Directors.

(a) Single borrower and borrower group exposure limits

Limits established by regulatory authorities have been incorporated into the credit policies where concentration is restricted by limiting credit amounts to a percentage of the capital base. This is supported by a stringent reporting requirement and is further enhanced by policies requiring periodic review of all commercial credit relationships.

(b) Industry exposure limits

These limits have been established based on a ranking of the riskiness of various industries. The ranking is guided by a model developed for the Group for this purpose. The model utilises a scale incorporating scores of 1 to 8 with 1 being the least risky. These have been consolidated into four (4) bands of exposure limits which have been set in relation to the total credit portfolio with a relatively smaller limit being assigned to the more risky industries.

(c) Country exposure limits

Exposure limits have been established for selected countries which are considered to be within the Group's off-shore target market. Five risk categories have been developed and the selected countries have been assigned to these categories based either on ratings issued by acceptable rating agencies or the Group's own internal assessment of the economic and political stability of the target. Maximum cross border exposure has been limited to a pre-determined portion of total assets and this amount is allocated to the various risk categories with a larger share being allocated to the more highly rated categories.

(d) Collateral

The Group employs a range of policies and practices to mitigate credit risk. The most common of these is accepting collateral for funds advanced. The Group has internal policies on the acceptability of specific classes of collateral or credit risk mitigation.

The Group requires a valuation of the collateral obtained as part of the loan origination process. This assessment is reviewed periodically. The principal collateral types for loans and advances are:

- Mortgages over residential properties;
- Charges over cash and cash convertible instruments.
- Charges over business assets such as premises, inventory and accounts receivable; and Charges over financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate/commercial entities are generally secured; revolving individual credit facilities are generally unsecured.

Collateral held as security for financial assets other than loans and advances depends on the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured, with the exception of asset-backed securities and similar instruments, which are secured by portfolios of financial instruments.

The Group's policies regarding obtaining collateral have not changed significantly during the period and there has been no significant change in the overall quality of the collateral held by the Group since the prior period.

(e) Liquidity support agreement

The terms of the Liquidity Support Agreement (LSA) under which First Citizens Bank Limited (the Bank) acquired Caribbean Money Market Brokers Limited (CMMB), now First Citizens Investment Services Limited (FCIS), outlined certain financial assurances given by the Government of Republic of Trinidad and Tobago (GORTT) to the Bank, that provided for the indemnification of the Bank against various claims, losses or liabilities if incurred by FCIS within a stipulated period of time after the date of acquisition in relation to obligations existing or default on assets owned by FCIS at the date of the acquisition.

The LSA dated 15 May 2009 and made between the GORTT, the Central Bank of Trinidad and Tobago (CBTT) and the Bank provided that all reasonable claims by the Bank in respect of such losses were expected to be settled, once the Bank had made all reasonable efforts to recover or resist such claims, losses or liabilities. The Bank committed to reimburse FCIS for any losses incurred by FCIS against which the Bank has been indemnified.

Losses which are covered under the LSA include losses in respect of balances due from CL Financial and its affiliates accruing from the date that CMMB was acquired by the Bank to the greater of the maturity date of the obligation or 6 years from the date of completion of the share transfer of CMMB to the Bank.

The Ministry of Finance continues to recognise its commitment under the LSA agreement by way of granting consecutive extensions under the Liquidity Support Agreement for the periods: 16 May 2015 to 15 November 2016 and subsequently for the period 15 November 2016 to 14 November 2017 and 15 November 2017 to 14 November 2018. Additionally, the Ministry of Finance has made good and settled in full subsequent claims made for losses and expenses incurred resulting from obligations commensurate with the Liquidity Support Agreement.

The Ministry of Finance in its response in letter dated 17 September 2018 has agreed to another extension for a twelve month period effective from 15 November 2018 to 14 November 2019 commensurate under the Liquidity Support Agreement dated 15 May 2009. This was subsequently formalised via the "Fourth Supplementary Liquidity Support Agreement" dated 19 September 2018.

(f) Credit-related commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit – which are written undertakings by the Group on behalf of a customer authorising a third party to draw drafts on the Group up to a stipulated amount under specific terms and conditions – are collateralised by the underlying shipments of goods to which they relate and therefore carry less risk than a direct loan.

(g) Impairment and provisioning policies

The Group's impairment provision policy is covered in detail in Note 2(e.i. c).

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

a. Credit risk (continued)

(ix) Maximum exposure to credit risk before collateral held or other credit enhancement

	Gross maximum exposure 2018 \$'000	Gross maximum exposure 2017 \$'000
Cash and bank balances	4,781,891	3,685,077
Statutory Deposit with Central Bank	4,243,111	3,387,702
Investment instruments		
Hold to collect and sell	10,507,714	12,433,633
Hold to collect	4,912,938	3,228,053
Hold for Trading		
Loans to customers	16,260,306	14,740,622
Loan notes	294,798	368,498
Other assets	466,507	303,964
Due from parent company	249	174
Credit Commitments	1,560,259	614,583
Financial Guarantees	209,281	266,621
Total credit risk exposure	43,237,054	39,028,927

The above table represents a worst case scenario of credit risk exposure to the Group without taking account of any collateral held or other credit enhancements attached.

(x) Loans to customers and other financial assets

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The gross carrying amount of financial assets below also represents the Group's maximum exposure to credit risk on these assets.

	Retail 30-Sep-18			Total \$'000	Sep-17 \$'000
	Stage 1 12-month ECL \$'000	Stage 2 Lifetime ECL \$'000	Stage 3 Lifetime ECL \$'000

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

a. Credit risk (continued)

(xi) Maximum exposure to credit risk

The Group closely monitors collateral held for financial assets considered to be credit-impaired, as it becomes more likely that the Group will take possession of collateral to mitigate potential credit losses. Financial assets that are credit-impaired and related collateral held in order to mitigate potential losses are shown below

Credit impaired assets

30 September 2018	Gross exposure \$'000	Impairment allowance \$'000	Carrying amount \$'000	Fair value collateral held \$'000
Individual (retail customers)				
Instalment loans	55,540	(45,788)	9,752	57,488
Demand loans	82,675	(30,723)	51,952	70,953

Credit cards	29,636	(29,636)	—	—
Mortgages	115,996	(21,378)	94,618	135,658
Sub-total	262,040	(119,706)	142,334	212,627
Corporate & Commercial				
Demand loans	169,229	(29,927)	139,302	322,532
Overdrafts	13,636	(4,014)	9,622	37,601
Sub-total	182,865	(33,941)	148,924	360,133
Total loans to customers	444,905	(153,647)	291,258	572,760

The following table shows the distribution of Loan to Value ratios (LTV) for the Group's mortgage credit-impaired portfolio:-

Mortgage Portfolio – LTV distribution	Credit-impaired (Gross carrying amount) \$'000
Lower than 50%	15,930
50 to 60%	21,405
60 to 70%	19,497
70 to 80%	11,556
80 to 90%	12,540
90 to 100%	12,174
greater than 100%	82,450
Total	175,552

(xii) Loss allowance

The loss allowance recognised in the period is impacted by a variety of factors, as described below:

- Transfers between Stage 1 and Stages 2 or 3 due to financial instruments experiencing significant increases (or decreases) of credit risk or becoming credit-impaired in the period, and the consequent step up (or step down) between 12 month and lifetime ECL;
- Additional allowances for new financial instruments recognised during the period, as well as releases for financial instruments de-recognised in the period;
- Impact on the measurement of ECL due to changes in PDs, EADs and LGDs in the period, arising from regular refreshing of inputs to models; currently nine years of data for PDs are being used, however it is management's intention to have a ten year rolling average for the PDs.
- Impacts on the measurement of ECL due to changes made to models and assumptions;
- Discount unwind within ECL due to the passage of time, as ECL is measured on a present value basis;
- Foreign exchange retranslations for assets denominated in foreign currencies and other movements; and
- Financial assets that were written off during the period (3.a.xiii).

The following tables explain the changes in the loss allowance between the beginning and the end of the annual period due to these factors:

Retail	Stage 1 12-month ECL \$'000	Stage 2 Lifetime ECL \$'000	Stage 3 Lifetime ECL \$'000	Total \$'000
Loss allowance as at 1 October 2017	14,538	4,537	119,713	138,788

Change in PDS/LGDs/EADs	56	(9,189)	8,478	(655)
Repayment	(56,677)	(5,158)	—	(61,835)
FX and other movements	—	—	—	—
Loss allowance as at 30 September 2018	19,586	10,075	365,412	395,073

Significant changes in the gross carrying amount of financial assets that contributed to changes in the loss allowance were as follows:

- New loans facilities originated during the period, increased the gross carrying amount of the relative books by 32.6%, with a corresponding \$45.4M increase in loss allowance measured.
- The write-off of loans and investments with a total gross carrying amount of \$12.0M resulted in the reduction of the Stage 3 loss allowance by the same amount.

The following table further explains changes in the gross carrying amount of the loan portfolio to help explain their significance to the changes in the loss allowance for the same portfolio as discussed above:

Retail	September 30 2018			Total
	Stage 1 12-month ECL \$'000	Stage 2 Lifetime ECL \$'000	Stage 3 Lifetime ECL \$'000

(xiii) Write-off policy

The Group writes off financial assets, in whole or in part, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include (i) ceasing enforcement activity and (ii) where the Group's effort to dispose of repossessed collateral is such that there is no reasonable expectation of recovering in full.

The Group may write-off financial assets that are still subject to enforcement activity. The outstanding contractual amounts of such assets written off during the year ended 30 September 2018 was \$12.0 million. The Group still seek to recover amounts it is legally owed in full, but which have been partially written off due to no reasonable expectation of full recovery.

(xiv) Modification & Replacements of financial assets

The Group sometimes modifies the terms of loans provided to customers due to commercial renegotiations, or for distressed loans, with a view to maximising recovery (note 2.e.c.i).

The Group continues to monitor if there is a subsequent significant increase in credit risk in relation to such assets through the Classified Credit Management Review process.

Notes to the Consolidated Financial Statements (continued)

3 Financial risk management (continued)

a. Credit risk (continued)

(xv) Concentration of risks of financial assets with credit risk exposure

The following table breaks down the Group's main credit exposure as categorised by industry sectors of counter parties:

	2018 Gross Maximum Exposure \$'000	2017 Gross Maximum Exposure \$'000
Cash and due from other banks	4,781,891	3,685,077
Statutory deposits	4,243,111	3,387,702
Consumer	3,247,351	2,911,577
Agriculture	138,862	12,229
Petroleum	881,840	470,697
Manufacturing	579,083	368,539
Construction	2,378,059	2,382,749
Distribution	611,742	424,792
Hotels and guest houses	725,684	686,896
Transport, storage and communications	1,150,739	918,748
Finance, insurance and real estate	5,811,921	6,072,892
Other business services	1,188,218	1,472,194
Personal services	27,004	25,815
Real estate mortgages	3,351,935	3,352,846
Government related	11,883,568	11,671,006
Credit commitments	1,560,259	614,583
Financial Guarantee	209,281	266,621
Other assets	466,505	303,964
Total	43,237,054	39,028,927

b. Market risk

The Group takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency, commodity and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates, commodity prices and equity prices. The Group separates exposures to market risk into either trading or non-trading portfolios.

The market risks arising from trading and non-trading activities are measured separately by the Group Market Risk Unit who submit reports to the SMERC on a regular basis and also reports via the Group Enterprise Risk Management Unit to the Board Enterprise Risk Management Committee to enable Board oversight of market risk issues. Additionally, on a monthly basis, the Group's Pricing Committee reviews and approves the yield curves used to value all investment securities and reports on this into the Group ALCO. This Committee also provides for the consideration of the Group ALCO technical information that may be relevant to current and developing market conditions from time to time.

Trading portfolios include those portfolios arising from market-making transactions where the Group acts as a principal with clients or with the market. Trading portfolios are those positions entered into primarily to take advantage of market movements to generate capital gains.

Non-trading portfolios primarily arise from the interest rate management of the Group's retail and commercial banking assets and liabilities. Non-trading portfolios also consist of interest rate, foreign exchange and equity risks arising from the Group's financial assets held to collect and sell.

(i) Currency risk

The Group takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. It is the policy of the Group not to engage in speculative foreign exchange activities, since its primary focus is to supply foreign currency to customers at a profit with the US dollar dominating trading. However, as supply usually lags behind customer demand, the Group may find itself in an overbought or oversold position.

The Group's strategy of managing this risk is to buy low and sell high; establish relationships with corporate foreign exchange earners; limit foreign exchange exposure; avoid speculation with an aim to keep a balanced position; and match foreign currency denominated assets with foreign currency denominated liabilities. The Group does not currently engage in any hedging activities to mitigate currency risk.

Foreign currency exposure for financial assets, financial liabilities and off balance sheet items:

Included in the "Other" category are assets and liabilities held in UK pound sterling, Canadian dollars, Euros, Barbados, Eastern Caribbean Dollars and Yen. A 1% increase or decrease in any of these currencies would not significantly impact the Group's profit.

If the TT\$ appreciates by 250 basis points against the US\$, the profit would decrease by \$70.0 million (2017: \$176.5 million). The average change for the last three (3) years was 207 basis point (2017: 207 basis points). There was no change in 2018.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

b. Market risk (continued)

(ii) Interest rate risk

Interest rate risk management focuses on potential changes in net interest income resulting from changes in interest rates, product spreads and mismatches in the re-pricing between interest rate sensitive assets and liabilities.

The Group takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on its financial position and future cash flows. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of the changes in market interest rates. Cashflow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of the changes in market interest rate. The Group takes on exposure to the effects of fluctuations in the prevailing level of market interest rates on both its fair value and cash flow risks.

The Group's objective in the management of its interest rate risk is to reduce the sensitivity of its earnings and overall portfolio value to fluctuations in the interest rate. The strategy employed to achieve this involves the active pricing of deposit and loan products, increasing market share of loans and funding, diversifying portfolios, changing the mix of products in accordance with market trends and reducing funding mismatch through long-term instruments.

The table below summarises the Group's exposure to interest rate risk. The assets and liabilities are categorised by the earlier of the repricing date and the maturity date.

As at 30 September 2018	Up to 1 month \$'000	1 to 3 months \$'000	3 to 12 months \$'000	1 to 5 years \$'000	Over 5 years \$'000	Non-interest bearing \$'000	Total \$'000

Interest sensitivity gap	(15,139,560)	1,060,309	594,058	8,860,835	8,916,721		

Interest rate risk management focuses on the potential changes in net interest income resulting from changes in interest rates, product spreads and mismatch in the re-pricing between interest rate sensitive assets and liabilities.

A 100 basis point increase in interest rates will cause a decrease in profit of 0.8 million (2017: \$5.4 million) and a decrease in reserves of \$345.1 million (2017: \$338.2 million).

(iii) Other price risk

Other price risk arises due to the possibility that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market. The Group is affected by changing prices of equity instruments mainly classified as hold to collect and sell securities with fair value movements recognised in shareholders' equity. Management has determined that the impact of the price risk on equity instruments classified as hold to collect and sell is immaterial at the end of both periods reported.

c. Liquidity risk

Liquidity risk is the risk that the Group will be unable to generate or obtain sufficient cash or its equivalent in a timely and cost-effective manner to meet its commitments when they fall due under normal and stress circumstances and arises from fluctuations in cash flows. The Group is exposed to daily calls on its available cash resources from overnight deposits, current accounts, maturing deposits and other funding instruments, loan draw downs, guarantees and from margin and other calls on cash settled derivatives. The Group does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty.

Liquidity risk management process

The Group's liquidity management process is carried out by the Treasury and International Trade Centre and monitored by the Group's Asset and Liability Committee (ALCO). The Group's liquidity management framework is designed to ensure that there are adequate reserves of cash and other liquid securities to satisfy current and prospective commitments arising from either on-balance sheet or off-balance sheet liabilities. The Group relies on a broad range of funding sources and applies prudent limits to avoid undue concentration. Current and projected cash flows are monitored, together with diversification of funding and contingency planning, and ensuring that funding disturbances are minimised. The Group manages liquidity risk using both expected and contractual cash flows, by preserving a large and diversified base of core deposits from retail and commercial customers, by maintaining ongoing access to wholesale funding and by maintaining a liquid pool of marketable securities dedicated to mitigating liquidity risk as a contingency measure. Fallback mechanisms include access to the local interbank and institutional markets and stand-by lines of credit with external parties and the ability to close out or liquidate market positions.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

c. Liquidity risk (continued)

Compliance with liquidity policies and risk limits is tracked by Group Market Risk and reported into the Senior Management Enterprise Risk Management Committee and via the Group Enterprise Risk Management Unit to the Board Enterprise Risk Management Committee.

(i) Financial assets and liabilities

The table below analyses financial assets and liabilities of the Group into relevant maturity groupings based on the remaining period at the year end to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

Total financial assets	6,287,576	3,312,370	6,375,496	13,956,148	15,785,921	45,717,512
Liquidity gap	(15,739,669)	859,470	1,664,374	12,109,577	14,510,586	13,404,339

(ii) Assets held for managing liquidity risk

The Group holds a diversified portfolio of cash and high-quality highly-liquid securities to support payment obligations and contingent funding in a stressed market environment. The Group's assets held for managing liquidity risk comprise:

- Cash and balances with central banks;
- Certificates of deposit;
- Government bonds and other securities that are readily acceptable in repurchase agreements with central banks; and
- Secondary sources of liquidity in the form of highly liquid instruments in the Group's investment portfolios.

(iii) Off-Balance sheet items

The table below analyses the contingent liabilities and commitments of the Group into relevant maturity groupings based on the remaining period at the year end to the contractual maturity date.

As at 30 September 2018	Up to 1 month \$'000	1 to 3 months \$'000	3 to 12 months \$'000	1 to 5 years \$'000	Over 5 years \$'000	Total \$'000
Credit commitments	1,369,148	—	191,111	—	—	1,560,259
Acceptances	6,252	10,107	2,159	—	—	18,518
Guarantees	97,863	28,972	20,050	28,880	21	175,786
Letters of credit	—	—	14,360	617	—	14,977
Operating leases	2,701	5,402	24,318	50,572	13,047	96,040
Capital commitments	—	—	67,935	—	—	67,935
Total	1,475,964	44,481	319,933	80,069	13,068	1,933,515

As at 30 September 2017	Up to 1 month \$'000	1 to 3 months \$'000	3 to 12 months \$'000	1 to 5 years \$'000	Over 5 years \$'000	Total \$'000
Credit commitments	148,580	—	466,003	—	—	614,583
Acceptances	17,780	6,062	12,362	—	—	36,204
Guarantees	102,217	8,382	16,215	62,748	21	189,583
Letters of credit	7,877	5,395	22,086	5,476	—	40,834
Operating leases	2,591	5,179	23,315	56,431	21,458	108,974
Capital commitments	—	—	17,523	—	—	17,523
Total	279,045	25,018	557,504	124,655	21,479	1,007,701

The ECL on the financial guarantees are nil, as all guarantees executed are secured by cash. The newly committed assets assessments are based on the clients risk profile, PDs, LGD and collateral position. There were no exposure, as a result they were classified under stage 1 with no ECL.

d. Fiduciary activities

The Group provides custody, trustee and investment management services to third parties which involve the Group making allocation and purchase and sale decisions in relation to a wide range of financial instruments. Those assets that are held in a fiduciary capacity are not included in these consolidated financial statements. The assets under administration at 30 September 2018 totalled \$29.7 billion (2017 - \$30.3 billion).

e. Operational risk

Operational risk is the risk of direct or indirect loss arising from system failure, human error, fraud and external events. The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and innovation. The Group manages this risk by developing standards and guidelines in the following areas:-

- Appropriate segregation of duties and access
- Reconciling and monitoring of transactions
- Documentation of controls and procedures
- Training and development of staff
- Reporting of operational losses and proposed remedial actions
- Development of contingency plans
- Information security
- Assessments of the processes
- Business continuity planning

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

f. Capital management

The Group's objectives when managing capital, which is a broader concept than the equity on the face of the statement of financial position, are:-

- To comply with the capital requirement set by the regulators in the differing jurisdictions in which the Group operates;
- To safeguard the Group's ability to continue as a going concern so that it can continue to provide returns to shareholders and benefits for other stakeholders;
- To ensure that the Group can remain solvent during periods of adverse earnings or economic decline; and
- To ensure that the Group is adequately capitalised to cushion depositors and other creditors against losses.

Capital adequacy and the use of regulatory capital are monitored monthly by the Group ALCO, employing techniques based on the guidelines developed by the Basel Committee on Banking Regulations and Supervisory practices, as implemented by the Central Bank of Trinidad and Tobago for supervisory purposes. The required information is filed with the Central Bank of Trinidad & Tobago on a monthly basis.

The Central Bank of Trinidad & Tobago requires each financial institution to:-

- Maintain a ratio of qualifying capital to risk adjusted assets of not less than the minimum standard of 8%.
- Core capital must not be less than fifty percent (50%) of qualifying capital i.e. supplementary capital must not exceed core capital.

The Central Bank of Barbados requires each financial institution to:-

- Maintain a ratio of qualifying capital to risk-weighted assets of not less than the minimum standard of 8%, of which the core capital shall be at least 4%.

The Group's regulatory capital is comprised of:-

- Tier 1 (Core) Capital:-share capital, retained earnings and reserves created by appropriations of retained earnings.
- Tier 2 (Supplementary) Capital – qualifying subordinated loan capital, impairment allowances and unrealised gains arising on the fair valuation of hold to collect and sell securities and property, plant and equipment.

Tier 1 (Core) Capital

	2018 \$'000	2017 \$'000
Share capital	354,957	354,957
Statutory reserve	879,335	879,335
Retained earnings	4,381,936	4,306,459
Less: Intangible assets	(219,871)	(212,356)
Total Tier 1	5,396,357	5,328,395

Tier 2 (Supplementary) Capital

Preference shares	103,600	103,600
Fair value reserves	901,889	1,065,679
Eligible reserve provision	119,784	172,029
Total Tier 2 Capital	1,125,273	1,341,308

Total Capital

Total Capital	6,521,630	6,669,703
----------------------	------------------	------------------

Ratios

Risk adjusted assets	16,577,673	13,731,400
----------------------	------------	------------

Qualifying capital to risk adjusted assets	39.34%	48.57%
--	--------	--------

Core capital to qualifying capital

Core capital to qualifying capital	82.75%	79.89%
------------------------------------	--------	--------

As at 30 September 2018 the Bank and its qualifying subsidiaries were in compliance with these requirements, with the exception of First Citizens Bank (Barbados) Limited.

The Ministry of Finance, Economic Affairs and Investments of the Government of Barbados, via a letter dated October 9 2018, advised that First Citizens Bank (Barbados) Limited has a three (3) year period in which to restore its capital to at least the statutory minimum.

g. Fair value of financial assets and liabilities

(i) Financial instruments not measured at fair value

The following table summarises the carrying amounts and fair values of those financial assets and liabilities presented on the Group's consolidated statement of financial position at an amount other than their fair value.

	Carrying value		Fair value	
	2018 \$'000	2017 \$'000	2018 \$'000	2017 \$'000
Financial assets				
Cash and due from other banks	4,781,891	3,685,077	4,781,891	3,685,077
Statutory deposits with Central Banks	4,243,111	3,387,702	4,243,111	3,387,702
Financial instruments				
- Loans to customers	16,014,956	14,434,580	16,758,709	15,860,901
- investments- hold to collect	4,590,400	3,222,099	4,808,160	3,276,337
- Loan notes	294,799	368,498	348,332	448,088
Other assets	505,666	339,870	505,666	339,870
Due from parent	249	174	249	174
Financial liabilities				
Customers' deposits	25,499,746	23,976,668	25,589,599	23,926,642
Other funding instruments	4,386,739	4,331,104	4,412,974	4,424,430
Bonds payable	2,865,766	1,400,000	2,958,765	1,444,136
Notes due to parent	58,000	58,000	58,000	58,000
Due to other Banks	1,512,249	1,504,340	1,512,249	1,504,340
Creditors and accrued expenses	748,499	542,679	748,499	542,679

The fair values of the Group's financial instruments are determined in accordance with International Financial Reporting Standards (IFRS 9). See note 4 for further details of the fair value measurements.

Financial instruments where carrying value is equal to fair value

Due to their liquidity and short-term maturity, the carrying values of certain financial instruments approximate their fair values. Financial instruments where carrying value is approximately equal to fair value include cash and due from other banks and statutory deposits with Central Banks.

Loans to customers less allowance for loan losses

Loans to customers are net of specific and other provisions for impairment, which reflects the additional credit risk. The estimated fair value of these loans represents the discounted amount of future cash flows based on prevailing market rates.

Investments – hold to collect

Fair value for hold to collect assets is based on market prices or broker/dealer price quotations. Where this information is not available, fair value is estimated using a discounted cash flow valuation methodology where all cash-flows of the instruments are discounted at an appropriate yield plus a credit spread where applicable. The fair value of the hold to collect portfolio is computed for disclosure purposes only. See note 3.g.ii for Fair Value Hierarchy.

Other loans and receivables

Other loans and receivables are net of provisions for impairment. The estimated fair value of receivables represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value. Receivables are generally for a period of less than one year.

Loan notes

The fair value of these notes are calculated using discounted cash flow analyses of comparable government borrowing rates for the terms indicated.

Customer deposits

Due to their liquidity and short-term maturity, the carrying values of some customer deposits approximate their fair value. The fair value of the other customer deposits are computed using discounted cash flow analyses at current market interest rates.

Bonds payable

The fair value of bonds payable is calculated using discounted cash flow analyses assuming the 'yield-to-call' method of valuation, when call options are in the money. When they are not in the money, the yield to maturity method of valuation is used. These bonds carry fixed interest rates and have been discounted using the prevailing market rate of similar instruments.

Note due to parent company

This note is payable on demand (no maturity stated). The fair value of this note approximates its carrying value.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

3 Financial risk management (continued)

g. Fair value of financial assets and liabilities (continued)

(ii) Fair value hierarchy

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to these valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Group's market assumptions. These two types of inputs have created the following fair value hierarchy:-

- Level 1 – Quoted prices (unadjusted) in active markets for identical assets or liabilities. This level includes listed equity securities and debt instruments on exchanges.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices). This level includes debt instruments.
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

This hierarchy requires the use of observable market data when available. The Group considers relevant and observable market prices in its valuations where possible.

The following table shows an analysis of financial instruments measured at fair value by level of the fair value hierarchy:

As at 30 September 2018	Level 1	Level 2	Level 3	Total
Financial assets	\$'000	\$'000	\$'000	\$'000
Financial assets at fair value				
- Debt securities	—	13,413	—	13,413
- Equity securities	—	439	—	439
	—	13,852	—	13,852
Fair value through OCI:				
- Investment securities – debt	797,775	9,331,296	327,652	10,456,723
- Investment securities – equity	56,051	2,629	8,701	67,381
	853,826	9,333,925	336,353	10,524,104
Total financial assets	853,826	9,347,777	336,353	10,537,956
As at 30 September 2017	Level 1	Level 2	Level 3	Total
Financial assets	\$'000	\$'000	\$'000	\$'000
Financial assets at fair value				
- Equity securities	655	—	—	655
	655	—	—	655
Fair value through OCI:				
- Investment securities – debt	743,015	10,120,435	1,552,275	12,415,725
- Investment securities – equity	39,332	2,940	8,937	51,208
	782,347	10,123,375	1,561,212	12,466,933
Total financial assets	783,002	10,123,375	1,561,212	12,467,588

Transfer of debt securities to level 3 were due to observable inputs being less readily available.

There were no transfers between Level 1 and Level 2 during the year. Reconciliation of Level 3 items are as follows:-

	30 September 2018			
	Debt Securities	Equity	Fair value	Total
	\$'000	\$'000	\$'000	\$'000
Opening balance	1,552,275	8,937	—	1,561,212
Change on initial application of IFRS 9	(855,875)	—	—	(855,875)
Restated opening balance	696,400	8,937	—	705,337
Fair Value through OCI	(76,598)	(233)	—	(76,831)
Fair Value through P & L	(180)	—	—	(180)

Purchased	587,770	10	—	587,780
Settlement	(260,600)	—	(239,958)	(500,558)
Total losses – OCI	8,089	401	—	8,490
Accrued interest	1,527	—	—	1,527
Amortisation	10,858	—	—	10,858
Transfer into or out of level 3	117,298	—	—	117,298
Closing balance	1,552,275	8,937	—	1,561,212

4 Critical accounting estimates and judgements

The Group makes estimates and assumptions about the future. The resulting accounting estimates will, by definition, rarely equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amount of assets and liabilities within the next financial year are outlined below:

a. Financial assets at FVOCI

The Group uses the discounted cash flow method to determine the fair value of hold to collect and sell financial assets not traded in active markets. The discounted cash flow method discounts the cash-flows of the financial assets at an appropriate yield plus a credit spread where applicable. The carrying amount of hold to collect and sell financial assets would decrease by \$345.1million if the discount rate used in the discounted cash flow analysis is increased by 100 basis points from management's estimates (2017 - \$338.2million).

The Group's credit spread methodology utilises gradient tenors and currency specific spreads. The appropriate credit spread for the agency or corporate fixed income security is determined using a cubic spline interpolation of the appropriate currency and credit rating category in the credit spread matrix based on the remaining tenor of the facility. This singular credit spread is then added to the discount spot rates to value the facility using the discounted cashflow method. In June 2017 Group Market Risk revised this methodology to reflect the credit risk of the facility as the credit risk on a per cash flow basis, and no longer on the full maturity of the facility. This resulted in moving from applying a single credit spread based on term to maturity, to multiple credit spreads based on each cash flow's term to maturity.

These financial statements include estimates of fair values of Government of Barbados instruments issued on 1 October 2018 in exchange for previously defaulted instruments. The fair values were obtained by identifying the relevant cashflows on each new instrument and discounting them to present values using the term structure of the derived Barbados dollar yield curve.

The proposed cash flows were discounted using the BBD yield curve derived using the Group's Pricing Methodology for Non Eurobond Securities. The sum of these discounted cash flows represented the Fair Value (as given by the NPV) of the New Instrument. The Impairment was determined as the difference between the NPV of the restructured bonds and the book value of the existing Government of Barbados bonds. A 100bps shift in the curve would result in the market value decreasing by \$40.4M.

The models used to determine fair values are validated and periodically reviewed by experienced personnel at Group Market Risk.

b. Financial assets at fair value through profit or loss

This category comprises two sub-categories: financial assets held for trading and financial assets designated by the Group as fair value through profit or loss upon initial recognition.

A financial asset is classified as held for trading if it is acquired or incurred principally for the purpose of selling or repurchasing it in the near term or if it is part of a portfolio of identified financial instruments that are managed together and for which there is evidence of a recent actual pattern of short-term profit taking. Derivatives are also categorised as held for trading.

For financial instruments traded in an active market, the determination of fair values of financial assets and liabilities is based on quoted market prices or dealer price quotations.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and these prices represent actual and regular occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive. Indicators that a market is inactive are when there is a wide bid-offer spread or significant increase in the bid-offer spread or there are few recent transactions. When a market becomes inactive, the valuation technique utilised makes use of the quoted price even though the market is not active.

c. Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and FVOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is further detailed in note 3.a.v, which also sets out key sensitivities of the ECL to changes in these elements.

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

4 Critical accounting estimates and judgements (continued)

c. Measurement of the expected credit loss allowance (continued)

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of ECL;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.
- Determination of macroeconomics drivers and forecasting macroeconomic scenarios
- Recovery rates on unsecured exposures
- Drawdown of approved facilities

Loss Given Default

The Loss Given Default rate on corporate senior unsecured bonds is estimated to be 60% based on the International Swaps and Derivatives Association standard Credit Default Swap contract specification for North American corporate issuers. The Loss Given Default rate on sovereign senior unsecured bonds is estimated to be 46% based on the average Loss Given Default rate on Sovereign bonds during the period 1983 to 2016 as reported by Moody's Investors Service (note 3.a.vi).

Valuation of Stage 3 facilities

The proposed cash flows were discounted using the BBD yield curve derived using the Group's Pricing Methodology for Non Eurobond Securities. The sum of these discounted cash flows represented the Fair Value (as given by the NPV) of the New Instrument. The Impairment was determined as the difference between the NPV of the restructured bonds and the book value of the existing Government of Barbados bonds. A 100bps shift in the curve would result in the market value decreasing by \$40.4M.

d. Income taxes

Management judgment is required in determining provisions for income taxes and there are many transactions and calculations for which the ultimate tax determination is uncertain. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made. When appropriate, particularly where the ultimate tax determination is uncertain, management also obtains opinions or advice from leading tax advisors and regularly reassesses its strategy in relation to such exposures.

The Group is subject to income tax in variance jurisdictions. Tax is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date. Substantive enactment is considered to be achieved when further steps in the enactment process will not change the outcome of a proposed change in tax law. Management considers the legislative process applicable in each jurisdiction in which it operates in determining at what point a proposed change in tax law will be considered substantively enacted by identifying the point after which further steps in the enactment process will not affect the outcome of the proposed change. In January 2017, the Corporation tax rate for Trinidad and Tobago was increased from 25% to 30%. It is also expected to increase again in 2018 to 35% for financial institutions.

e. Retirement benefits

The present value of the retirement benefit obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of pension obligations.

The assumptions used in determining the net cost (income) for pensions include the discount rate, salary and pension increases. The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the pension obligations. In determining the appropriate discount rate, the Group considers the interest rates of high-quality corporate bonds, and where no deep corporate market exist, the Government bonds are used, that are denominated in the currency in which the benefits will be paid and that have terms to maturity approximating the terms of the related pension liability. In determining the salary increases, the Group considered long-term salary inflation, age, merit and promotion (note 20.j for sensitivity).

The Bank's Board of Directors approved an increase in the retirement age from 60 to 65 effective January 1 2019. The impact of this change is a one-off reduction in the defined benefit obligation, which is recognised in the "past service cost/(credit)" of \$57.2 million (note 20.b.)

f. Fair valuation of properties

The best evidence of fair value is current prices in an active market for similar lease and other contracts. In the absence of such information, the Bank determines the amount within a range of reasonable fair value estimates. In making the judgement, the Bank considers information from a variety of sources including:

- (i) Current prices in an active market for properties of different nature, condition or location (or subject to different lease or other contracts), adjusted to reflect those differences;

- (ii) Recent prices of similar properties in less active market, with adjustments to reflect any changes in economic conditions since the date of the transactions that occurred at those prices; and

- (iii) Discounted cash flow projections based on reliable estimates of future cash flows, derived from the terms of any existing lease and other contracts and (where possible) from external evidence such as current market rents for similar properties in the same location and condition, and using discount rates that reflect current market assessments of the uncertainty in the amount and timing of the cash flows.

The valuations are based on current market conditions and thus may change in the future (note 14 (a) ii).

g. Estimated impairment of goodwill

The Group tests annually whether goodwill has suffered any impairment in accordance with the accounting policy stated in note 2 b (iii). The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. If the discounted rate used in the value-in-use calculation was increased by 100 basis points from management's estimates, the value in use calculation will still exceed the fair value less cost to sell calculation, and there will be no impairment of goodwill.

5 Segment analysis

For management purposes, the Group is organized into five business segments based on products and services as follows:-

- **Retail banking:** includes loans and mortgages, deposit, foreign exchange transactions, credit and debit cards and card merchant acquiring business with retail and commercial customers.
- **Corporate banking:** loans and credit facilities and deposits and current accounts for corporate and institutional customers.
- **Treasury management and investment banking:** Liquidity management and investment banking services including corporate finance, and specialised financial trading.
- **Asset management:** Investment products and services to institutional investors and intermediaries.
- **Group function:** Finance, legal, and other centralised functions.

Other Group operations comprise fund management, institutional finance and providing computer services, none of which constitutes a separately reportable segment and business activities from head office.

As the Group's segment operations are all financial with a majority of revenues deriving from interest and the Group Chief Executive Officer relies primarily on net interest revenue to assess the performance of the segment, the total interest income and expense for all reportable segments is presented on a net basis.

There were no changes in the reportable segments during the year.

Transactions between the business segments are carried out at arm's length. The revenue from external parties reported to the Group Chief Executive Officer is measured in a manner consistent with that in the consolidated income statement. The segmental information is reported gross and therefore consolidation adjustments have not been eliminated.

Funds are ordinarily allocated between segments, resulting in funding cost transfers disclosed in inter-segment net interest income. Interest charged for these funds is based on the Group's average cost of funding. There are no other material items of income or expense between the business segments.

Internal charges and transfer pricing adjustments have been reflected in the performance of each business. Revenue-sharing agreements are used to allocate external customer revenues to a business segment on a reasonable basis.

The Group's management reporting is based on a measure of operating profit comprising net interest income, loan impairment charges, net fee and commission income, other income and non-interest expenses.

The information provided about each segment is based on the internal reports about segment profit or loss, assets and other information, which are regularly reviewed by the Executive Management.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of the consolidated statement of financial position.

First Citizens Bank Limited And Its Subsidiaries

(A Subsidiary of First Citizens Holdings Limited)

Consolidated Financial Statements

30 September 2018

First Citizens

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

7 Statutory deposits with central bank

Under the provisions of Financial Institutions Act 2008 (Trinidad and Tobago), the Bank and its subsidiary (First Citizens Asset Management Limited) are required to maintain as a deposit with the Central Bank of Trinidad and Tobago restricted cash balances. These balances represent a ratio of certain deposit liabilities held in such form and to such extent as the Central Bank may prescribe from time to time. As of 30 September 2018, the current ratio was 17% for First Citizens Bank Limited and 9% for First Citizens Asset Management Limited. Under the provisions of the Act, it can be waived for a specified period of time and on such conditions as may be determined by the Central Bank. In 2018, the Central Bank discontinued the compulsory deposit account, which amounted to \$346.3 million as at 2017 and carried an average interest rate of 0.53%.

In Barbados, under the provisions of the Financial Institution Act, 1996-16, the Bank's subsidiary, First Citizens Bank (Barbados) Limited, is required to maintain as a deposit with the Central Bank of Barbados restricted cash balances. This balance represents a ratio of customers deposit balances (both domestic and foreign currency) held in such form and to such extent as the Minister, on advice of the Central Bank may prescribe from time to time. As at 30 September 2018, the ratio was 15% of total domestic customer deposit balances (comprising 10% government securities and 5% cash) plus 2% of total foreign customer deposit balances.

As at 30 September 2018 the Bank and its qualifying subsidiaries were in compliance with these requirements.

8 (a) Investments – Hold to collect and sell

11 Loan notes

The loan notes due to the Group comprise the following:		
(i) Taurus Services Limited	273,943	342,428
(ii) First Citizens Holdings Limited (Holdings)	20,856	26,070
	<u>294,799</u>	<u>368,498</u>

(i) This represents several interest bearing notes issued by Taurus Services Limited as consideration for assets sold to Taurus Services Limited as part of the restructuring of the three former banks and Government support for the Company on its formation (See Note 1).

The terms of the original notes, dated 30 September 1994, were as follows:

- Tenor of 15 years with effect from 30 September 1994;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum;
- A moratorium of 5 years on principal payments; and
- Government guarantee.

On 1 October 2000, a new agreement was entered into whereby the GORTT made a bullet payment to reduce part of the interest accrued. The unpaid portion of the interest up to that date of \$150 million was capitalised. Thereafter, accrued interest was capitalised semi-annually until 30 September 2002 (the end of the moratorium) and this totalled \$198.4 million. The new principal balance outstanding on the restructured loan notes as at 30 September 2004 which includes all capitalised interest to date amounted to \$1,267 million.

The terms of this new agreement are as follows:

- Tenor of 22 years with effect from 1 October 2000;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum;
- A moratorium of 2 years on both principal and interest;
- Payment of principal and interest in semi-annual intervals thereafter; and
- Government guarantee.

To date, these notes have been serviced in accordance with the new agreement. These notes are not transferable. On 8 November 2007, the Group was informed of the GORTT's intention to early repay these notes. To date, there have been no further developments.

(ii) This represents the balance on a loan note issued by Holdings as consideration for \$40 million redeemable preference shares in the Bank and a non-interest bearing note in the amount of \$58 million issued by the Bank. The original terms of the note were as follows:

- Tenor of 15 years with effect from 30 September 1994;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum; and
- Government guarantee.

On 1 October 2000, a new agreement was entered into whereby unpaid interest up to that date of \$11.2 million was capitalised. Thereafter, accrued interest was capitalised semi-annually until 30 September 2002 (the end of the moratorium) and this totalled \$17.9 million. The new principal balance outstanding on the restructured loan note as at 30 September 2004 which includes all capitalised interest to date amounted to \$96.5 million.

The terms of this new agreement are as follows:

- Tenor of 22 years with effect from 1 October 2000;
- Interest rate of 4.5% below prime with a floor rate of 11.5% per annum;
- A moratorium of 2 years on both principal and interest;
- Payment of principal and interest in semi-annual intervals thereafter; and
- Government guarantee.

To date, this note has been serviced in accordance with the agreements. This note is not transferable.

The ECL for the Taurus note was computed using the PD for the GORTT, which is a counterparty of this agreement. This is classified under Stage 1 with no impact.

12 Other assets

	2018 \$'000	2017 \$'000

St Lucia Electricity Services Limited is listed on the Eastern Caribbean Securities Exchange. The investment in associate at 30 September 2018 includes goodwill of \$4.6 million (2017: \$4.6 million). The reporting period for St Lucia Electricity Services Limited is December. The information below reflects The Group's share of the results of associate and its share of the assets (including goodwill and liabilities) as at August 2018, are as follows:

Name	Country of Incorporation	Assets \$'000	Liabilities \$'000	Revenues \$'000	Profits \$'000	% Interest Held
2018						
St. Lucia Electricity Services Limited	St. Lucia	1,264,101	488,764	761,534	72,837	19.11
2017						
St. Lucia Electricity Services Limited	St. Lucia	1,250,006	492,298	697,600	96,097	19.11

The fair value of the investment in associate at 30 September 2018 is \$152.8 million (2017: \$149.4 million).

a. Recognised fair value measurements

(i) Fair value hierarchy

This note explains the judgements and estimates made in determining the fair values of the non-financial assets that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its non financial assets carried at fair value into the three levels prescribed under the accounting standards. An explanation of each level is provided in note 3.7(b).

Level 3	2018 \$'000	2017 \$'000
Land and building	424,534	394,047
Building on Lease Land	21,769	34,684
Freehold Land	2,250	6,556
	448,553	435,287

The Group's policy is to recognise transfers into and transfers out of fair values hierarchy levels as at the end of the reporting period. There were no transfers between levels 1 and 2 for recurring fair value measurements during the year.

(ii) Valuation techniques used to determine level 2 and level 3 fair values

As at 30 September 2018, the Group's freehold premises were stated at revalued amounts determined by external, independent and qualified valuers. Valuations were made on the basis of open market value. Open market values are determined by considering the current market condition. Changes in fair value are recorded in the statement of comprehensive income. The Group's policy is to obtain independent valuations for its freehold land and buildings at least every three years.

At the end of each reporting period, management update their assessment of the fair value of each property, taking into account the most recent independent valuations. Management determine a property's value within a range of reasonable fair value estimates.

The best evidence of fair value is current prices in an active market for similar properties. Where such information is not available Management consider information from a variety of sources including:

- current prices in an active market for properties of different nature or recent prices of similar properties in less active markets, adjusted to reflect those differences;
- discounted cash flow projections based on reliable estimates of future cash flows.

(iii) Transfer between level 2 and 3 and change in valuation techniques

There were no transfers between levels 2 and 3 for recurring fair value measurements nor change in the valuation technique during the financial year.

Level 3 fair values of land and retail units have been derived using the sales comparison approach. Sales prices of comparable land and buildings in close proximity are adjusted for differences in key attributes such as property size. The most significant input into this valuation approach is price per square foot. If the price per square foot increase by 100 basis points, the fair value will increase by \$13.0M (2017:\$16.3M) with a corresponding entry in the reserve in shareholders' equity.

Impairment	(17,949)	—	—	(17,949)
Closing net book amount	156,886	38,872	16,598	212,356

Goodwill is reviewed annually for impairment or more frequently when there are indicators that impairment may have occurred. First Citizens Barbados goodwill of \$17.9M was identified as impaired in 2017.

Impairment test for goodwill

Goodwill is allocated for impairment testing purposes for the following cash generating units as follows:-

	2018 \$'000	2017 \$'000
Goodwill		
First Citizens Investment Services (FCIS)	156,886	156,886
	156,886	156,886

The recoverable amounts of the cash generating units were determined based on value-in-use. Cash flow projections used in the value-in-use calculations were based on financial projections by management covering a five (5) year period and a discount rate. Cash flow beyond that five year period have been extrapolated using the growth rate for the respective units.

The key estimates used in the value-in-use calculations are as follows:-

	2018	FCIS	2017
Estimates used in the value for use			
Net interest margin growth	12.58%		9.23%
Growth rate	4.00%		5.00%
Discount factors	5.69%		3.37%

These assumptions were used for the analysis of each cash generating unit. Management determined the net interest margin and growth rate based on past performance and its expectations of the market developments.

Goodwill is reviewed annually for impairment, or more frequently when there are indicators that impairment may have occurred. The impairment test carried out as at 30 September 2018 for FCIS, revealed that the value in use is in excess of the carrying amount.

16 Customers' deposits

	2018 \$'000	2017 \$'000
Deposits are analysed by sector as follows:		
Public institutions	7,606,562	7,525,255
Private institutions	9,384,185	8,281,430
Consumers	8,508,999	8,169,983
	25,499,746	23,976,668
Current portion	25,077,361	23,631,876
Non current portion	422,385	344,792
	25,499,746	23,976,668

Deposits due to customers only include financial instruments classified as liabilities at amortised cost. Deposits amounting to \$4.7 billion (2017: \$4.5 billion) are at fixed rates. All other deposits amounting to \$20.8 billion (2017: \$19.5 billion) are at variable rates.

17 Other funding instruments

	2018 \$'000	2017 \$'000
Loan participation	—	4,211
Repurchase agreements	4,112,559	4,052,703
Funds under management	25,429	25,439
USD Fixed Rate Note	248,751	248,751
	4,386,739	4,331,104

Other funding instruments are analysed by sector as follows:

	2018 \$'000	2017 \$'000
Public institutions	1,456,884	1,337,954
Private institutions	1,933,834	2,049,219
Consumers	996,021	943,931
	4,386,739	4,331,104
Current portion	3,719,197	3,690,349
Non-current portion	667,542	640,755
	4,386,739	4,331,104

The securities sold under the repurchase agreements only include financial instruments classified at amortised cost (see Note 8a). Interest rates on these repos range from 0.20% to 5.89% in 2018 (2017: 0.20% to 5.89%).

18 Due to other Banks

	2018 \$'000	2017 \$'000
Short term	1,077,586	1,070,850
Medium term	434,663	433,490
	1,512,249	1,504,340

Short-term borrowings represented demand facilities via a number of financial institutions.

Medium-term borrowings represents unsecured borrowings of US\$34.9 million, and TT\$197.7 million from clients for a period of three years. The average interest rate for 2018 was 3.21% (2017: 3.21%).

19 Creditors and accrued expenses

	2018 \$'000	2017 \$'000
Accrued expenses	132,881	138,654
Other liabilities	229,231	266,849
Interest payable	75,310	52,353
Due to GOTT	21,478	25,531
Due to brokers	8,645	41,010
Funds payable to bondholders	280,954	18,282
	748,499	542,679

The amount due to GORTT relates to what is owed by the Bank with respect to payments made on claims which were subsequently recovered pursuant to Liquidity Support Agreement outlined in note 3 a. (iv) (e).

(Expressed in Trinidad and Tobago dollars)

20 Retirement benefit asset

	2018 \$'000	2017 \$'000
a. <i>Net liability in balance sheet</i>		
Present value of obligation	(1,368,439)	(1,368,808)
Pension plan assets at fair value	1,343,706	1,300,217
Value of surplus/(deficit)	(24,733)	(68,591)
Net defined benefit asset/(liability)	(24,733)	(68,591)
b. <i>Movement in present value of defined benefits obligation:</i>		
Beginning of year	1,368,808	1,254,103
Current year service cost	55,935	51,177
Interest cost	75,979	69,613
Members contributions	14,041	13,617
Past service cost/(credit)	(57,215)	—
Re-measurements		
- Experience adjustments	(5,258)	21,593
- Actuarial (gains) from change in financial assumptions	(39,473)	—
Benefits paid	(44,378)	(41,295)
Defined benefit obligation at end of year	1,368,439	1,368,808
c. <i>The defined benefit obligation is allocated between the Plan's members as follows:</i>		
- Active	68%	69%
- Deferred members	7%	7%
- Pensioners	25%	24%
The weighted average duration of the defined benefit obligation at year end	18.6 years	19.3 years
96% of the benefits for active members are vested		
40% of the defined benefit obligation for active member is conditional on future salary increases		
d. <i>Movement in fair value of plan assets:</i>		
Beginning of year	1,300,217	1,224,650
Interest income	71,523	67,324
Return of plan assets, excluding interest income	(28,452)	9,395
Company's contributions	32,213	27,876
Members contributions	14,041	13,617
Benefits paid	(44,378)	(41,295)
Expense allowance	(1,458)	(1,350)
Fair value of plan assets at end of year	1,343,706	1,300,217
Actual return on plan asset	43,071	76,719
e. <i>Asset allocation</i>		
Local and regional equity securities	379,434	375,551
Overseas equities (outside CARICOM)	236,052	214,788
TT\$ denominated bonds	664,239	632,288
US\$ denominated bonds	28,803	27,935
Cash and cash equivalents	34,924	49,418
Other (annuities, mortgages etc.)	254	237
Fair value of plan assets at end of year	1,343,706	1,300,217

All asset values as at 30 September 2018 were based on unaudited accounts provided by First Citizens Trustee Services Limited. Overseas equities have quoted prices in active markets. Local equities also have quoted prices but the market is relatively illiquid. The Plan's investment manager calculates the fair value of the Government bonds and corporate bonds by discounting expected future proceeds using a constructed yield curve.

The majority of the Plan's government bonds were issued by the Government of Trinidad & Tobago, which also guarantees many of the corporate bonds held by the Plan.

The Plan's assets are invested using a strategy agreed with the Plan's Trustee and Management Committee.

This strategy is largely dictated by statutory constraints (at least 80% of the assets must be invested in Trinidad & Tobago and no more than 50% in equities) and the availability of suitable investments.

There are no asset-liability matching strategies used by the Plan.

	2018 \$'000	2017 \$'000
f. <i>Expenses recognised in profit or loss</i>		
Current service costs	55,935	51,177
Net interest on net defined benefit liability/asset	4,456	2,289
Past service cost/(credit)	(57,215)	—
Administrative expenses	1,458	1,350
Net pension income	4,634	54,816
g. <i>Re-measurement recognized in other comprehensive income</i>		
Experience (gains)/Losses	(16,279)	12,198
Total amount recognised in other comprehensive income	(16,279)	12,198
h. <i>Reconciliation of opening and closing balance sheet entries</i>		
Opening defined benefit (liability)/asset	(68,591)	(29,453)
Net pension cost	(4,634)	(54,816)
Re-measurements recognised in other comprehensive income	16,279	(12,198)
Company contribution paid	32,213	27,876
Closing defined benefit (liability)/asset	(24,733)	(68,591)
i. <i>Summary of principal assumptions as at 30 September</i>		
Discount rate	5.5%	5.5%
Average individual salary increases	5.5%	5.5%
Future pension increases	1.25%	1.5%
Assumptions regarding future mortality are based on published mortality tables. The life expectancies underlying the value of the defined benefit obligation as at 30 September 2018 are as follows:		
Life expectancy at age 60 for current pension in years		
- Male	21.0	21.0
- Female	25.1	25.1
Life expectancy at age 60 for current members age 40 in years		
- Male	21.4	21.4
- Female	25.4	25.4
j. <i>Sensitivity analysis</i>		
The calculation of the defined benefit obligation is sensitive to the assumptions used. The following table summarises how the defined benefit obligation as at 30 September 2017 would have changed as a result of a change in the assumptions used.		
	1% pa decrease	1% pa increase
Discount rate	278,942	(207,009)
Future salary increases	(90,498)	107,454
Future pension increases	(129,940)	129,940

An increase of 1 year in the assumed life expectancies shown above would increase the defined benefit obligation at 30 September 2018 by \$23.8 million (2017: \$23.0 million).

These sensitivities were calculated by re-calculating the defined benefit obligations using the revised assumptions.

k. *Funding*

The Bank meets the balance of the cost of funding the defined benefit Pension Plans and the Bank must pay contributions at least equal to those paid by members, which are fixed. The funding requirements are based on regular (at least every 3 years) actuarial valuations of the Plans and the assumptions used to determine the funding required may differ from those set out above. The Bank expects to pay \$36.5 million to the Pension Plans during 2018/19.

(i) TTD Fixed Rate Bond Series 1 – In August 2014, this bond for \$400 million was issued. This bond is unsecured and carries a fixed rate of 3.10 % with a tenor of seven (7) years. Interest is payable semi-annually in arrears. Principal will be repaid in a bullet payment at maturity.		
(ii) TTD Fixed Rate Bond Series 2 – In August 2014, this bond for \$100 million was issued. This bond is unsecured and carries a fixed rate of 3.25 % with a tenor of ten (10) years. Interest is payable semi-annually in arrears. Principal will be repaid in a bullet payment at maturity. A onetime call option exists on the 7th anniversary subject to the minimum notice of 90 days.		
(iii) TTD Fixed Rate Bond – In October 2015, this bond for \$900 million was issued. This bond is unsecured and carries a fixed rate of 4.25 % with a tenor of seven (7) years. Interest is payable semi-annually in arrears. Principal will be repaid in a bullet payment at maturity. A onetime call option exists on the 5th anniversary subject to the minimum notice of 60 days.		
(iv) USD Fixed Rate Bond – In January 2018, this bond for \$90.4 million was issued. This bond is unsecured and carries a fixed rate of 4.25 % with a tenor of five (5) years. Interest is payable semi-annually in arrears. Principal will be repaid in a bullet payment at maturity. A prepayment option exists after the 2nd anniversary subject to the minimum notice of 60 days.		
(v) TTD Fixed Rate Bond – In April 2018, this bond for \$860.7 million was issued. This bond is unsecured and carries a fixed rate of 4.50 % with a tenor of six (6) years. Interest is payable semi-annually in arrears. Principal will be repaid in a bullet payment at maturity. A prepayment option exists after the 5th anniversary subject to the minimum notice of 60 days.		

22 Deferred income tax

Deferred income taxes are calculated on all temporary differences under the liability method using the applicable tax rate for each subsidiary

	2018 \$'000	2017 \$'000
The movement on the deferred income tax account is as follows:		
At beginning of year	(252,429)	(228,342)
Impact of revaluation adjustments recorded directly to shareholders' equity:		
- Revaluation on hold to collect and sell financial assets	76,805	(17,096)
- Revaluation on hold to collect due to reclassification	476	57
- Revaluation on property, plant and equipment	(462)	—
- Remeasurement of defined benefit liability	(13,713)	(4,965)
Credit to consolidated statement of income (note 34)	<u>(4,938)</u>	<u>(2,083)</u>
At end of year	<u>(194,261)</u>	<u>(252,429)</u>

Deferred income tax assets and liabilities are attributable to the following items:

	2018 \$'000	2017 \$'000
First Citizens Holdings Limited	<u>58,000</u>	<u>58,000</u>

The amount due to Holdings is a non-interest bearing note with no specified maturity date, issued in part consideration for a note acquired from Holdings (see Note 11 (ii)).

First Citizens Bank Limited And Its Subsidiaries

(A Subsidiary of First Citizens Holdings Limited)

Consolidated Financial Statements

30 September 2018

First Citizens

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

24 Share capital

The total authorised number of shares are issued and fully paid. Thirty five point five seven percentage (35.57%) of these shares are trading on the local stock exchange.

	2018 \$'000	2017 \$'000
251,353,562 ordinary shares of no par value	539,957	539,957
Treasury shares/stock	(185,000)	(185,000)
42,500,000 A preference shares of no par value	42,500	42,500
61,100,000 B preference shares of no par value	61,100	61,100
	<u>458,557</u>	<u>458,557</u>

The Class A preference shares are non-convertible, non-participating and non-voting. The option for redemption expired in September 1999. The shares pay cumulative dividend of 4% per annum. The Class B preference shares pay cumulative dividends of 2% per annum when declared, but are non participatory, non-voting, non convertible and non-redeemable.

Employee share ownership plan

In April 2017, the shareholders approved the establishment of an employee share ownership plan for the Group's staff. The anticipated first distribution, if any is 31 March 2019 and is based on the profit of the Bank for the financial period ending 30 September 2018. The Group is awaiting the Board of Inland Revenue (BIR) approval.

	2018	2017
Shares allocated to the Plan		
Opening balance	5,781,250	—
Number of shares purchased	—	5,781,250
Shares allocated to employees	—	—
	<u>5,781,250</u>	<u>5,781,250</u>

25 Statutory reserves

The Financial Institutions Act 2008, Part VI, Section 56 1(a) (Trinidad and Tobago) stipulates that a Bank must transfer at the end of each financial year no less than 10% of its profits after taxation to a Reserve Fund until the amount standing to the credit of the Reserve Fund is not less than the stated capital or assigned capital of the Bank.

In accordance with the Financial Institutions Act 1996-16, the Bank's subsidiary, First Citizens Bank (Barbados) Limited, is required to transfer to a reserve fund a minimum of 25% of the net income for the year, wherever the amount of the reserve fund is less than the stated capital.

The FIA 2008 Section 60.1, also indicated that no licensee shall incur, deposit liabilities of an amount exceeding twenty (20) times the sum of its stated capital or assigned capital and Statutory Reserve Fund.

26 Retained earnings

The retained earnings is the accumulated net income that is retained by the group at a particular point of time, such as at the end of the reporting period. At the end of that period, the net income (or net loss) at that point is transferred from the Profit and Loss Account to the retained earnings account.

27 Other reserve

i Fair value reserve

The fair value reserve comprises the cumulative net change in the fair value of investment securities measured at FVOCI, less ECL allowances recognised in profit or loss, net deferred tax, until the assets are derecognised or impaired.

ii Revaluation reserve

The revaluation reserve relates to the revaluation of the freehold property.

iii Re-measurement of defined benefit reserve

The re-measurements of the defined benefit represents actuarial gains and losses, returns on plan assets (outside of any changes recorded as net interest) and any changes in the asset ceiling (outside of any changes recorded as net interest).

iv Translation reserve

The translation reserve comprises all foreign currency differences arising from translation of the financial statements of foreign operations, as well as in a separate component in equity in the consolidated financial statements.

28 Interest income

	2018 \$'000	2017 \$'000

Consolidated Financial Statements

30 September 2018

First Citizens

Notes to the Consolidated Financial Statements (continued)

(Expressed in Trinidad and Tobago dollars)

34 Other operating expenses (continued)

The Central Bank and Financial Institutions (Non-Banking) (Amendment) Act, 1986 of Trinidad & Tobago established a Deposit Insurance Fund for the protection of depositors. By the Central Bank (Deposit Insurance) Order 1986, dated 17 September 1986, an annual premium of 0.2% of the average deposit liabilities outstanding as at the end of each quarter of the preceding year is levied.

The Barbados Deposit Insurance Corporation (BDIC), established under the Deposit Insurance Act-29 of 2006, came into operation on 8 June 2007. The deposit insurance initial contribution and premium was set at 0.05% of the insurable deposits held by the member during the calendar year preceding the calendar year for which the premium is payable.

35 Taxation

	2018 \$'000	2017 \$'000
Current tax	334,815	235,200
Prior period (over)/under provision	(3,420)	(2,833)
Deferred tax (Note 22)	4,938	2,083
	<u>336,333</u>	<u>234,450</u>

The tax on profit before tax differs from the theoretical amount that would arise using the basic rate of tax as follows:

	2018 \$'000	2017 \$'000
Profit before taxation	1,010,026	876,382
Tax calculated 35% (2017: 30%)	353,509	262,865
Income exempt from tax	(75,381)	(71,574)
Expenses not deductible for tax purposes	86,975	53,919
Prior year under provision	(3,420)	(2,833)
Effects of different tax rates in other countries and businesses within the group	(25,350)	(7,927)
	<u>336,333</u>	<u>234,450</u>

d. Pension Plan

Employer's contribution (Note 20.d)	32,213	27,876
-------------------------------------	--------	--------

e. Government of the Republic of Trinidad and Tobago

As stated in note 1, on the formation of the Bank it was agreed that the assets and liabilities of the predecessor financial institutions would be transferred to the Bank and the non-performing portfolio sold to a liquidating company in consideration for an equivalent amount of Government-guaranteed notes and commercial paper. In 2009, the Bank entered into a Liquidity Support Agreement with GORTT and the Central Bank in relation to the acquisition of the shares of Caribbean Money Market Brokers Limited, now First Citizens Investment Services Limited which provided indemnification of the Bank against certain losses. In addition, the Central Bank agreed to put specific liquidity arrangements in place by way of pro notes to facilitate CLB fixed deposits transferred to the Bank in 2009.

The current amount outstanding on these arrangements and obligations and the related income and expenses are disclosed below:-

The current amount outstanding on these arrangements and obligations and the related income and expenses are disclosed below:-

Interest expense	24,638	24,140
Financial assets- Hold to collect and sell	8,663,210	7,488,190
Financial assets – Hold to collect	—	457,163
Financial assets – Other Loans and Receivable	514,768	516,177
Investment income	409,655	327,486

38 Commitments

a. Capital commitments

Capital expenditure approved by the Directors but not provided for in these accounts	67,255	17,523
--	--------	--------

b. Credit commitments

Commitments for loans approved not yet disbursed	1,560,259	614,583
--	-----------	---------

39 Contingent liabilities

a. Litigation

The Group is involved in claims and counterclaims arising from the conduct of its business. Based on the facts now known to the Group, the Directors believe that the outcome of these matters would not have a material adverse effect on the position of the Group.

b. Customers' liability under acceptances, guarantees and letters of credit

These represent the Group's potential liability, for which there are claims against its customer in the event of a call on these commitments.

	2018 \$'000	2017 \$'000
Acceptances	18,518	36,204
Guarantees	175,786	189,583
Letters of credit	14,977	40,834
	<u>209,281</u>	<u>266,621</u>

40 Lease rentals

The Group leased certain premises under non-cancellable operating leases expiring in various years up to 2026. The leases contain renewal options from five to twenty-five years. Rental expense incurred under lease agreements amount to \$37.3 million for the year 2018 (2017: \$37.4 million).

The future lease obligations under non-cancellable leases are summarised below:

	2018 \$'000	2017 \$'000
- Up to one year	32,425	31,085
- One year to five years	50,571	56,431
- Over five years	13,047	21,458
	<u>96,043</u>	<u>108,974</u>

41 Subsequent events

On 17 December 2018, the Board of Directors declared a final dividend payment of \$ 0.48 per share payable to shareholders.
